Office of Statewide Initiatives

Nevada Rural and Frontier Health Data Book – Twelfth Edition is a publication from the Nevada Health Workforce Research Center in the Office of Statewide Initiatives at the University of Nevada, Reno School of Medicine.

The mission of the Office of Statewide Initiatives is to improve the health of Nevadans through statewide engagement, education, and research. The vision of programs in the Office of Statewide Initiatives is to promote health and prevent disease, as well as provide technical assistance that increases access to high-quality health care for all Nevadans.

The purpose of the Nevada Health Workforce Research Center is to improve the collection and analysis of data on health workforce supply and demand to enhance health workforce planning and development in Nevada.

Nevada Rural and Frontier Health Data Book

Introduction: Health and Health Care in Rural and Frontier Nevada

The *Nevada Rural and Frontier Health Data Book – Twelfth Edition* contains a wide range of current county level information on the resident population, economy, social environment, population health, health workforce, and the health care delivery system. It includes important data for public policy makers, health care professionals and administrators, rural health care advocates, and equally important, the residents of rural and frontier Nevada. The primary purpose of this data book is to provide the most current and accurate data for these audiences, as well as for those interested in learning more about health and health care in Nevada.

Utilizing over 100 sources of public and private data, most tables provide county level data aggregated at the regional level highlighting important distinctions between rural and urban regions of the state. In some cases, the only available data is regional in nature (e.g., HIV/AIDS prevalence rates). In other instances, the data counts for individual rural and frontier counties are suppressed by the data-collecting agency for confidentiality or other reasons (e.g., teen pregnancy rates). Regardless, the expressed intent of this publication is to highlight important differences among the urban, rural, and frontier areas of the state.

Given the disruption in population health and health care caused by the COVID-19 pandemic, not to mention the state's ever-changing demography, economy, and health care delivery system, some of the data must be approached with caution. In some cases, the information is not updated on a regular basis. Consequently, the "most current" available data likely understates county and regional trends (e.g., occupational and industry estimates). Nonetheless, the information presented in this volume is, to our best knowledge, the most current available.

The *Nevada Rural and Frontier Health Data Book – Twelfth Edition* is divided into six major sections containing the most current data on:

- Demographic characteristics of rural and frontier Nevada, including recent population estimates and projections;
- The social and economic characteristics of rural and frontier Nevada, including data on income, poverty, and educational attainment;
- Health insurance coverage in rural and frontier Nevada, including data on Medicare and Medicaid coverage;

- Population health status in rural and frontier Nevada, including age-adjusted mortality rates and numerous morbidity indicators;
- Health care workforce in rural and frontier Nevada, including estimates and projections for many licensed health care occupations across the major regions of the state; and
- Health care resources and the economics of health care in rural and frontier Nevada, including recent hospital financial and utilization trends.

The majority of tables contained in the *Data Book* are organized into two broad categories: (1) rural and frontier counties and (2) urban counties. Rural and frontier counties include Churchill, Douglas, Elko, Esmeralda, Eureka, Humboldt, Lander, Lincoln, Lyon, Mineral, Nye, Pershing, Storey, and White Pine Counties. Urban counties include Carson City, Clark County, and Washoe County.

Provider-to-population ratios, insurance enrollment rates, and other population-based ratios and calculations utilize population estimates certified by the Nevada State Demographer's Office for any given year. Some of the population estimates presented in this *Data Book* and utilized in the aforementioned denominators vary slightly from those published later in the same year. Numbers and percentages presented throughout the data book may not add up due to rounding. Dollar figures and estimates are noted below the tables as to whether they have been adjusted for inflation. A complete list of data sources is contained at the end of this report, as well as endnotes providing additional information on data and data sources.

Nevada Rural and Frontier Health Data Book – Twelfth Edition details important differences among rural, frontier, and urban areas of Nevada. These differences impact population health, the availability of hospital and other health care resources, and access to health care services between rural and frontier and urban areas. For example, the age distribution of a county has a significant influence on the health status and health care needs of a population. The population age distribution within a county may affect available resources for local residents (e.g., proportion of county income from Social Security and other transfer payments) and health care providers (e.g., number and percent of Medicare-eligible residents).

All things being equal, rural counties tend to have an older population than urban counties. An older population, in turn, is typically at a greater risk of death and disability than a younger population and uses a disproportionately larger share of health care resources. In general, urban, rural and frontier areas possess important differences in demographics, economics, and social characteristics, which produce differences in health priorities, population health, health-related behaviors, the delivery of health services, and access to health care. For example, research has generally documented higher levels of obesity and smoking prevalence, lower levels of health insurance coverage, and greater barriers to accessing health care services in rural versus urban areas. Thus, it is not surprising that rural areas have significantly higher age-adjusted all-cause mortality rates and cause-specific mortality rates than urban areas.

Defining Rural and Frontier

The definition of what is and is not a “rural” area is no mere academic matter. Indeed, policy makers utilize different, and in some cases competing, classification schemes to target programs, services, and projects to populations in Nevada and the United States. The classification scheme adopted by the Nevada State Office of Rural Health and utilized in this edition of the *Nevada Rural and Frontier Health Data Book* emphasizes the important distinctions between “rural” and “frontier” regions of the state. This classification scheme was developed by the National Center for Frontier Communities (NCFC) with input from state health planners and rural health professionals throughout the country.

The Center’s classification scheme distinguishes certain areas of the country as being more remote than rural areas. The Center’s classification scheme represents an improvement over previous schemes that defined “frontier” simply in terms of population density, where counties with a population density of six or less persons per square mile were defined as “frontier.” Frontier counties are different from rural counties by being more remote in terms of travel time and distance from the nearest population centers with more specialized medical care and facilities. Additional information on the Center’s classification scheme and methodology can be found at the [NCFC](#) website.

Map 1 highlights the three urban counties (Carson City, Clark County, and Washoe County), three rural counties (Douglas, Lyon, and Storey Counties), and the remaining eleven frontier counties. It also indicates the location of Nevada’s major towns, cities, and county seats. According to population estimates prepared by the Nevada State Demographer’s Office, 3.0 million Nevadans or 90.5% of the state’s population reside in the state’s three urban counties. Approximately 73.1% of the state’s population resides in Clark County (Las Vegas metropolitan area) alone and 15.6% in Washoe County (Reno-Sparks metropolitan area). In comparison, an estimated 318,540 Nevadans or 9.5% of Nevada’s population reside in the state’s rural and frontier counties. The rural and frontier population spreads over 95,431 square miles or 86.9% of the state’s land mass.

Map 1 also provides a current snapshot of the major health care services available to rural and frontier residents of Nevada. This map excludes the offices of physicians, emergency medical services agencies, or other individual health providers. While most of the state’s tertiary care centers are concentrated in the state’s three urban counties, a diverse range of acute care hospital services, outpatient clinics, and medical services are scattered across twelve of the state’s fourteen rural and frontier counties (exceptions are Storey and Esmeralda counties where there are no health care facilities). These hospitals and clinics – highlighted in greater detail throughout this data book – provide most of the basic health care received by our state’s rural and frontier populations.

Map 2 illustrates the considerable heterogeneity of Nevada’s population and geography utilizing “Rural-Urban Commuting Areas” or “RUCA” codes ranging from 1 (the red shaded, core urbanized areas) to 10 (the blue shaded, mostly frontier, isolated areas of the state). The RUCA methodology provides a more fine-grained classification of rural areas applicable at both the county and sub-county units of analysis. Map 2 underscores the concentration of most of the state’s population in zip code areas located in the northwestern and southern counties of the state (RUCAs 1-2), and the dispersion of the remaining 10

percent of the population is scattered across a vast geographic expanse of rural and frontier regions of the state (RUCAs 4-10). There are no areas of Nevada with a RUCA code of 3 or 9.

Map 2 also highlights the considerable variation within counties. For example, the urban counties of Clark County and Washoe County contain substantial areas that are rural or frontier in nature. Conversely rural and frontier counties such as Lyon and Nye Counties possess comparatively small urban areas or zip codes that are economically integrated with urban centers in the state.

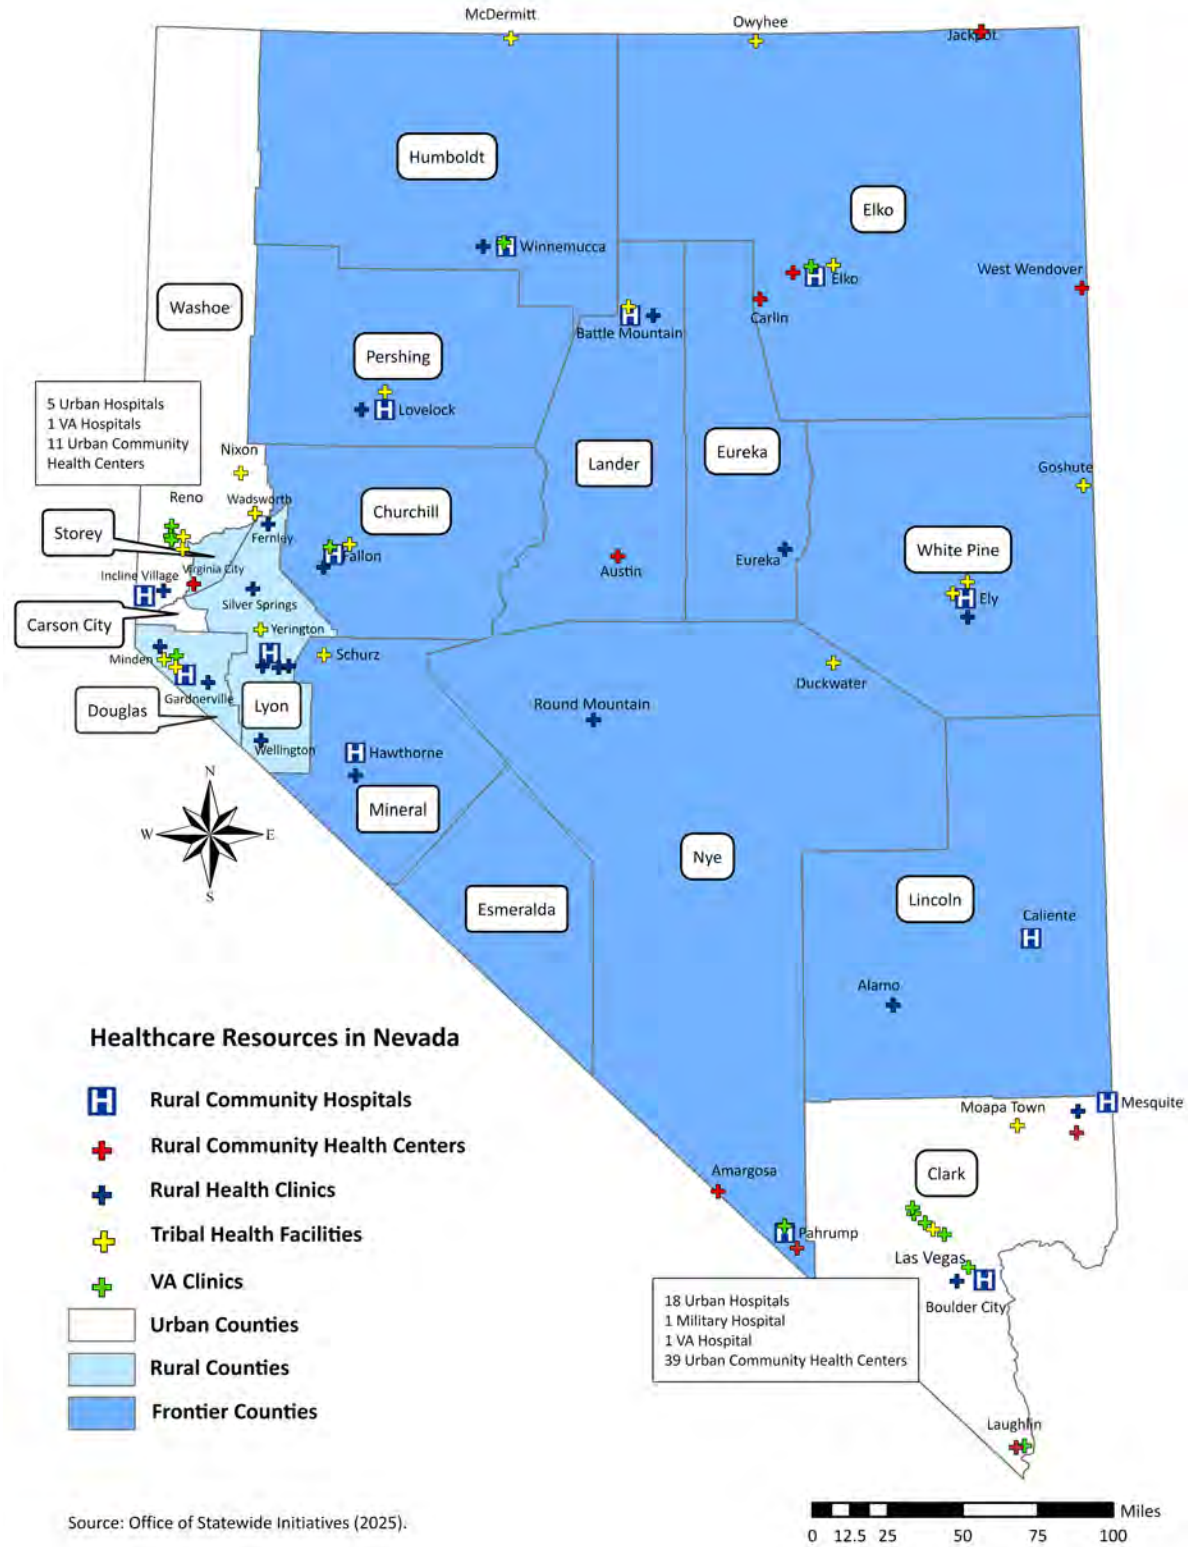

Map 3 highlights the unique topography and vast distances separating the state's rural communities from the urban centers. Most rural and frontier communities are located in sparsely populated counties that are considerable distances from the state's urban and tertiary health care centers. The average distance between acute care hospitals in rural Nevada and the next level of care or tertiary care hospital is 109 miles and the average distance to the nearest incorporated town is 43 miles. Consequently, the primary health care delivery issue for rural and frontier residents and communities in Nevada is how best to overcome the spatial isolation and enormous geographic distances that characterize most rural and frontier communities in Nevada.

Nevada comprises the western half of our nation's Great Basin. Ridge after ridge of rugged, brown mountains are broken up with flat sage covered valleys. The Great Basin is a high desert defined by 150 mountain ranges running north to south and earthquake activity second only to Hawai'i. Most mountain passes are subject to very difficult seasonal weather conditions. Most major roads follow the north to south pattern with two major exceptions. U.S. Highway 50 – "the loneliest road in America" – across the middle of the state winds through numerous mountain summits. Interstate 80 curves northeast across the state largely following the railroad tracks built in the 1870's. Travel time from most county hospitals to regional medical centers is thus measured in hours not minutes. Driving long distances is a very daunting task to obtain emergency health care in winter conditions. Helicopter pads are located at all rural hospitals for emergency transport to/from either Reno, Las Vegas, or other emergency care centers.

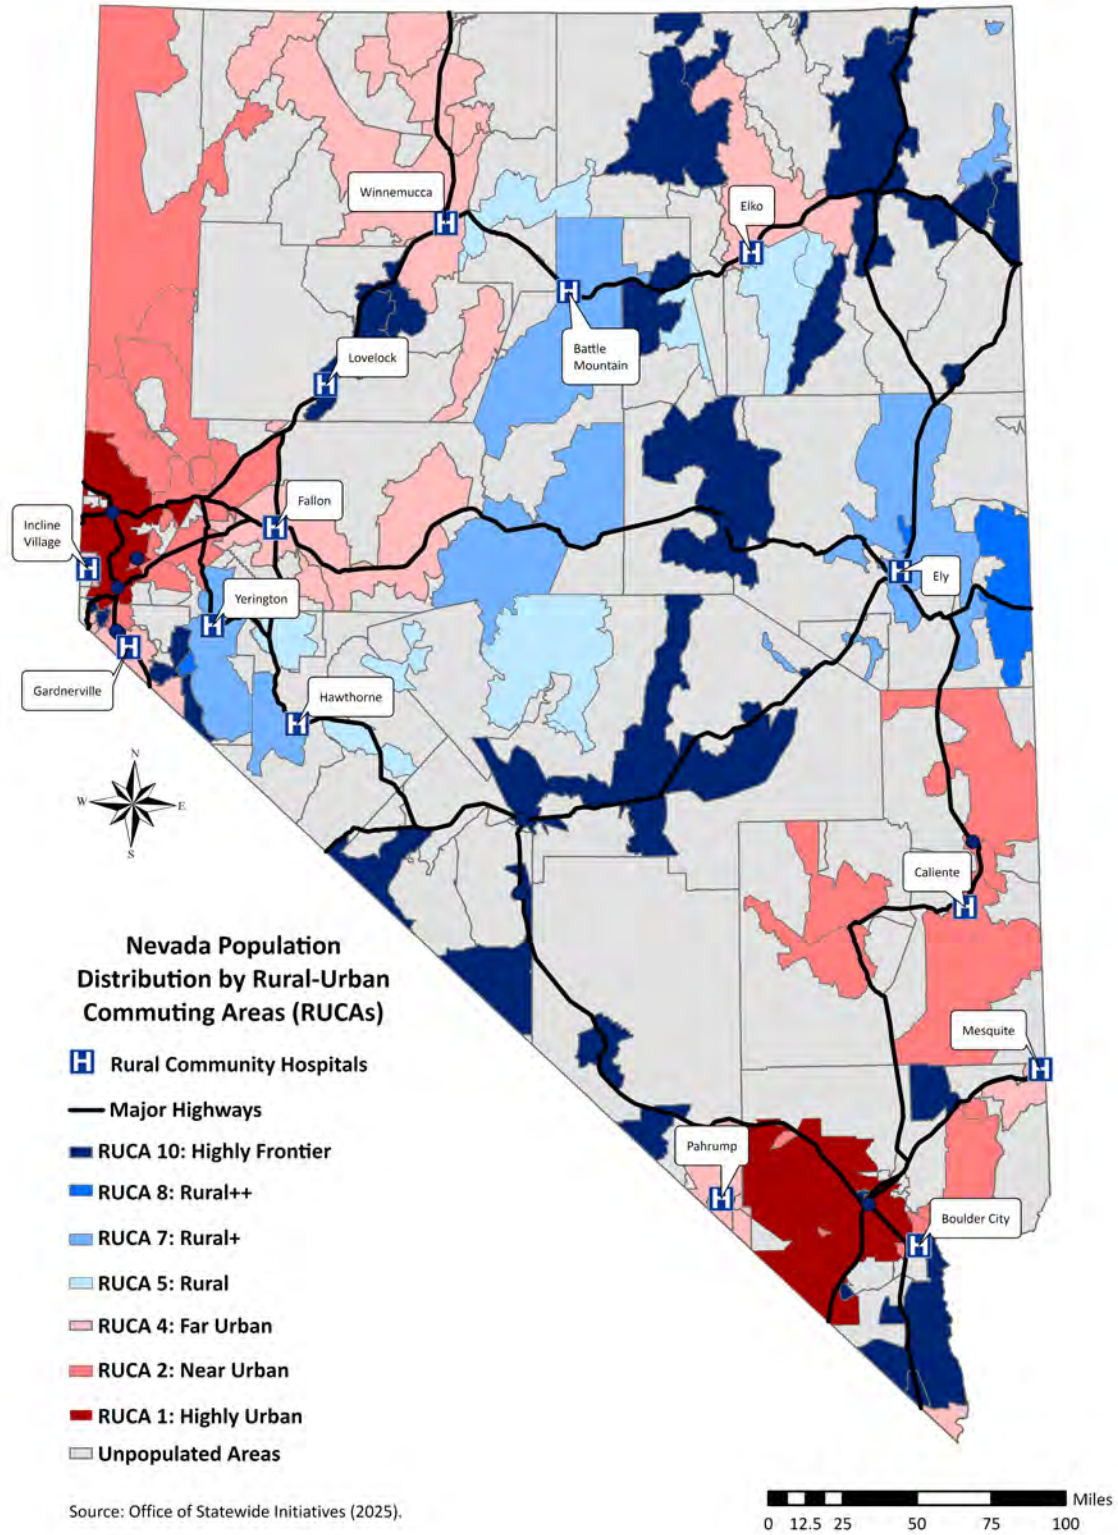

Map 4 details public and private land ownership in Nevada. Approximately 10 percent of land is privately owned (shaded black). The remaining 90 percent is publicly owned and administered by a wide range of federal, state, and tribal entities. The major administrators of public lands in Nevada are the Bureau of Land Management, Departments of Defense and Energy, and the U.S. Forest Service. The checkerboard pattern along Interstate 80 and the Humboldt River in Northern Nevada highlights a large swath of land owned either by the Bureau of Land Management or the railroad company's land grants.

Map 5 highlights the enormous geographic expanse of the state – Nevada is the 7th largest state in the U.S. – by comparing it with selected northeastern states. Nevada's land mass is approximately 110,000 square miles. By comparison, seven northeastern states with a combined land mass of 47,820 square miles would easily fit within Nevada's borders.

Data Book Sections and Contents

Section One: Demographic Profile of Rural and Frontier Nevada

The first section of the *Nevada Rural and Frontier Health Data Book – Twelfth Edition* contains the most current data on the social and demographic characteristics of rural and frontier Nevada, including information on:

- Population and population density
- Population change and projections
- Population aging and diversification
- Population by place of birth
- Veterans in Nevada
- Prison population

Section Two: Social and Economic Profile of Rural and Frontier Nevada

The second section contains the most current data from state and federal agencies on the social and economic characteristics of rural and frontier Nevada, including data on:

- Personal and family income
- Income inequality
- Poverty rates for children and adults
- Educational enrollment, spending, and attainment
- Voter registration and voter turnout
- Violent crime and property crime statistics

Section Three: Health Insurance Coverage in Rural and Frontier Nevada

The third section contains the most current data on health insurance coverage in rural and frontier Nevada, including information on:

- Health insurance coverage and the uninsured
- Medicare coverage, including enrollment in Medicare Advantage plans
- Medicaid coverage
- Nevada Check Up coverage
- Veterans Health Administration enrollment and users

Section Four: Population Health Profile of Rural and Frontier Nevada

The fourth section contains the most current data on population health in rural and frontier Nevada, including information on:

- County health rankings
- Population health status and risk factors to health
- Adult and youth behavioral risks to health trends
- Teen pregnancy and birth rates
- All-cause mortality rates
- Cause-specific mortality rates, such as heart disease and cancer

Section Five: Health Care Workforce in Rural and Frontier Nevada

The fifth section contains the most current data on the health care workforce in rural and frontier Nevada, including data on:

- General labor market trends
- Hospital and health sector employment and payroll trends
- Geographic distribution of licensed physicians, nurses, and other health professionals
- Licensed physicians, nurses, and other health professionals
- Health professional shortage areas (HPSA)

Section Six: Health Care Resources and Economics in Rural and Frontier Nevada

The sixth section contains the most current data on health care facilities, health care resources, and economic aspects of health care in rural and frontier Nevada, including information on:

- Hospital and clinic resources
- Health care and hospital industry sector employment and payroll
- Economic impact of hospitals and the health sector
- Rural health clinics, community health centers, and tribal facilities
- Tribal health services
- Utilization trends and financial performance among the state's rural and frontier hospitals

The data sources, explanation of data tabulations, and notes on the strengths and weaknesses of the data presented for each table, figure, and map in the data book are contained in the appendices.

Acknowledgments and Support

We would like to thank the numerous individuals, organizations, and agencies who assisted us in the preparation of this data book or provided data used in the Twelfth edition of the data book. In particular, we would like to acknowledge:

- Henry Agbewali, Office of Analytics, Nevada Department of Health and Human Services
- Chris Wright, Nevada State Demographer’s Office
- Fred Steinmann, PhD, University Center for Economic Development, University of Nevada, Reno
- Tom Harris, PhD, Professor Emeritus, University of Nevada, Reno
- Jody Sekerak, MS, Phoenix Area Indian Health Services (IHS)
- Kelly Flannery, MHA, Veterans Health Administration
- State of Nevada Health Professions Licensing Boards

The responsibility for any errors of omission or commission are ours alone.

In closing, since health and health care in rural and frontier Nevada are ever changing, our ambition is to continue to update and distribute this volume on a biennial basis. If your organization or agency utilizes the data book, we would appreciate learning more about how you have used it and how future editions of the data book can be improved. Additional data and information on health and health care in Nevada is available on the [Nevada Instant Atlas](#). As such, please send your comments and suggestions, as well as requests for additional copies to Tabor Griswold, PhD, at tgriswold@med.unr.edu.

Nevada Rural and Frontier Health Data Book

Section One: Demographic Profile of Rural and Frontier Nevada

This section of the *Nevada Rural and Frontier Health Data Book – Twelfth Edition* provides a wide range of current data on demographic indicators by county and region in Nevada. For additional demographic data and trends, please visit the [Nevada Instant Atlas](#).

Highlights and key findings of this section include:

- The current population of Nevada is 3,367,231 including 318,540 residents in the state’s fourteen rural and frontier counties (Table 1.1).
- The population in Nevada is projected to grow from 3,367,231 in 2025 to 3,777,272 in 2035 (12.2%) (Table 1.1).
- Over the next decade, the population of rural and frontier Nevada is projected to grow by 18,314 or 5.7% – all 14 rural and frontier counties are projected to increase population (Table 1.1).
- Currently, 9.5% of the state’s population resides in rural and frontier areas, as compared to 90.5% residing in the state’s three urban counties – Approximately 2.5 million residents or 73.1% of the state’s population resides in Clark County alone (Table 1.2).
- While rural and frontier counties represent only 9.5% of the state’s population, these counties cover 86.9% of the state’s land mass or 95,431 square miles (Table 1.2).
- Currently, there are 30.7 people per square mile in Nevada. Population density ranges from 0.3 persons per square mile in Esmeralda County to 420.5 persons per square mile in Carson City (Table 1.2).
- Between 2013 and 2023, the population of rural and frontier Nevada increased by 30,454 or 10.8% – 10 rural and frontier counties increased population, while four lost population (Table 1.3).
- Between 2013 and 2023, 4 of the 6 fastest growing counties in Nevada were rural and frontier: Esmeralda County (24.4%), Lyon County (19.3%), Nye County (17.3%), and Douglas County (12.1%) (Table 1.3)

- Currently, 21.2% of the state’s population is 17 and under, 62.6% are between 18 and 64 years of age, and 16.2% are 65 and over (Table 1.4).
- In 2025, nine rural and frontier counties in Nevada had more people aged 65 and over than people 17 years of age and under (Table 1.4).
- Counties with the highest percentage of population aged 65 and over include: Douglas County (30.2%), Storey County (29.5%), Nye County (29.5%), and Esmeralda County (24.6%) (Table 1.4).
- From 2000 to 2022, the median age increased in every county of Nevada except for Mineral County – the state average increased from 35.7 years in 2000 to 38.5 years in 2022 (Table 1.5).
- In 2022, among rural and frontier counties, the median age ranged from 34.9 years in Elko County to 55.7 years in Storey County; by comparison, among urban counties, the median age ranged from 37.8 years in Clark County to 42.1 in Carson City (Table 1.5).
- The number of residents aged 17 and under in Nevada is projected to increase from 717,931 in 2025 to 747,435 in 2035 – an increase of 29,504 or 4.1% (Table 1.6).
- For the next ten years, the growth rate in the population aged 17 and under in rural and frontier counties (3.0%) is projected to be lower than urban counties (4.2%) (Table 1.6).
- The number of residents between the ages of 18 and 64 in Nevada is projected to increase from 2,121,007 in 2025 to 2,339,084 in 2035 – an increase of 218,077 or 10.3% (Table 1.7).
- For the next ten years, the growth rate in the population aged 18 to 64 in rural and frontier counties is projected to increase by 5.9%, as compared to an increase in urban counties of 10.7% (Table 1.7).
- The number of residents aged 65 and over in Nevada is projected to increase from 547,140 in 2025 to 679,502 in 2035 – an increase of 132,362 or 24.2% (Table 1.8).
- For the next ten years, the growth rate in the population aged 65 and over in rural and frontier counties (14.4%) is projected to be lower than urban counties (25.7%) (Table 1.8).
- The population aged 65 and over is expected to increase in 10 of 14 rural and frontier counties over the next ten years – overall, the number of residents aged 65 and over in rural and frontier Nevada is projected to increase by 10,304 or 14.4% through 2035 (Table 1.8).
- In 2025, there are 1,597,659 White people followed by 1,066,060 people of Hispanic origin in Nevada. Other ethnic groups are Black (315,755), Native American (35,533), and Asian Pacific Islander (352,223) (Table 1.9).
-

- Hispanic residents represent 17.7% of the population in rural and frontier counties and 33.1% of the population in urban counties of Nevada (Table 1.10).
- Hispanic residents are a growing segment of the population in all 17 counties in Nevada – the percent of the population of Hispanic origin in rural and frontier counties ranges from 6.0% in Storey County to 27.6% in Humboldt County. The Hispanic population in urban counties ranges from 25.2% in Carson City to 34.4% in Clark County (Table 1.10).
- Between 2025 and 2035, the Hispanic population in Nevada is projected to increase by 141,833 or 13.3% – the growth rate in urban counties (13.5%) is projected to exceed that of rural counties (9.9%) (Table 1.11).
- The Hispanic population growth (13.3%) is projected higher than the overall population growth in Nevada (12.2%) (Tables 1.1 and 1.11).
- Currently, there are 163,818 military veterans in Nevada, representing 4.9% of the state’s population (Table 1.12).
- There are 21,008 veterans residing in rural and frontier counties of Nevada – rural veterans represent 12.8% of all veterans in Nevada and 6.6% of the total population of rural and frontier Nevada (Table 1.12).
- The percent of the population who are military veterans ranges from 3.9% in Elko and Pershing Counties to 9.4% in Nye County in rural and frontier areas, as compared to a range of 4.6% in Washoe County to 5.8% in Carson City in urban areas (Table 1.12).
- According to the Veterans Health Administration, the veteran population is projected to decline in every county between 2025 and 2035 – the total Veterans population in Nevada is projected to change from 206,607 in 2025 to 192,189 in 2035 (-7.0%). (Table 1.13).
- In 2022, an estimated 846,922 residents of Nevada were born in Nevada (27.8% of the population), 1.6 million residents were born in the U.S. outside of Nevada (52.8%), and 592,273 were born in another country (19.4%) (Table 1.14).
- Currently, rural and frontier counties in Nevada have a slightly higher percentage of native-born residents (31.2%) than urban counties (27.4%). Rural and frontier counties have a higher proportion of residents born outside of Nevada (61.9%) than urban counties (51.8%) (Table 1.14).
- A much greater proportion of foreign-born residents reside in the urban counties of Nevada (20.8%) than in rural and frontier counties (6.9%). The foreign-born population ranges from 1.0% of the total population in Lincoln County to 13.7% in Esmeralda County in rural and frontier areas and 13.2% in Carson City to 22.3% in Clark County in urban areas of the state (Table 1.14).

- Currently, there are 10,517 prisoners in State of Nevada correctional facilities with 2,822 prisoners are in rural and frontier counties, 26.8% of the prison population. Pershing County has 1,566 prisoners, 14.9% of the state prison population (Table 1.15).

Table 1.1: Population in Nevada by County – 2025 to 2035

Region/County	Population			Change – 2025 to 2035

Nevada Rural and Frontier Health Data Book

Section Two: Social and Economic Profile of Rural and Frontier Nevada

This section of the *Nevada Rural and Frontier Health Data Book – Twelfth Edition* provides a wide range of current data on social and economic indicators by county and region in Nevada. For additional social and economic data and trends, please visit the [Nevada Instant Atlas](#).

Highlights and key findings of this section include:

- In 2022, county level per capita personal income in rural and frontier Nevada ranged from \$39,865 in Pershing County to \$100,296 in Douglas County (Table 2.1).
- The average per capita income for all rural and frontier counties (\$57,685) was below the urban average of \$66,085 and below the U.S. average of \$65,470 (Table 2.1).
- In 2022, rural and frontier county level per capita personal income ranged from 64.2% in Pershing County to 161.5% in Douglas County as a percent of the Nevada average per capita personal income (Table 2.1).
- In 2022, county level per capita personal income in rural and frontier areas as a percent of the U.S. average per capita personal income ranged from 60.9% in Pershing County to 153.2% in Douglas County (Table 2.1).
- From 2012 to 2022, per capita personal income in Nevada increased from \$50,701 to \$62,085 (Table 2.2).
- Over the past decade, per capita personal income in rural and frontier counties increased from \$47,319 to \$57,685 (Table 2.2).
- The Gini coefficient measures the income distribution of a county's population. Coefficients range between 0.0 (no inequality) and 1.0 (high inequality) among a county's population. In general, urban counties possess higher levels of income inequality than rural counties (Map 2.1).
- Rural populations have higher levels of income from government transfer payments (e.g. Social Security) from the government (21.2% of total income) than urban populations (16.9%) (Table 2.3).
- Transfer payments as a percent of total personal income ranged from 12.7% in Storey County to 38.1% in Mineral County (Table 2.3).

- Rural and frontier counties had transfer payments from the following sources: Social Security and other retirement (36.9%); Medicare and other medical benefits (44.2%); income maintenance benefits (8.3%); and unemployment and other benefits (10.6%) (Table 2.4).
- Urban counties had transfer payments from the following sources: Social Security and other retirement (33.8%); Medicare and other medical benefits (44.4%); income maintenance benefits (10.4%); and unemployment and other benefits (11.4%) (Table 2.4).
- In 2022, median family income in Nevada was \$85,584 or 92.4% of the U.S. median family income of \$92,646 (Tables 2.5).
- Median family income in 2022 among rural and frontier counties of Nevada ranged from \$57,417 in Mineral County to \$110,426 in Storey County (Table 2.5).
- In 2022, 10 of 14 rural and frontier counties had a median family income above the state average of \$85,584 and 7 of 14 rural and frontier counties were above the U.S. average of \$92,646 (Table 2.5).
- Currently, median household income in Nevada is \$71,646 or 95.3% of the U.S. average of \$75,149 (Table 2.5).
- Median household income among rural and frontier counties in Nevada ranged from \$40,694 in Esmeralda County to \$92,388 in Lander County in 2022 (Table 2.5).
- 6 of 14 rural and frontier counties in 2022 had a median household income above the state average of \$71,646 and 5 of 14 were above the U.S. average of \$75,149 (Table 2.5).
- In 2022, there were 394,516 Nevadans in poverty (12.6% of the state’s population) – there were 31,975 rural and frontier residents in poverty (11.5% of the population) (Table 2.6).
- From 2012 to 2022, the number of Nevadans in poverty decreased by 46,857 or 3.6% – decline in poverty was greater in urban counties (4.4%) than rural and frontier counties (1.3%) (Table 2.6).
- Between 2012 and 2022, the number in poverty increased in 4 rural and frontier counties. The percentage in poverty increased in 3 rural counties (Table 2.6).
- In 2022, there were 111,697 children in poverty in Nevada (16.5% of children aged 17 and under) – there were 8,684 children in poverty in rural and frontier counties (15.7%) (Table 2.7).
- Between 2012 and 2022, the percent of children in poverty in rural counties only increased in Eureka County (5.3%) and decreased the most in Churchill County (8.9%) (Table 2.7).
- By comparison, the number of children in poverty in urban counties decreased by 38,054 or 9.3% (Table 2.7).

- In 2022, 662,613 Nevadans or 19.6% of the state’s population participated in the Supplemental Nutrition Assistance Program (SNAP), including 48,743 or 15.5% of rural and frontier residents (Table 2.8).
- Between 2012 and 2022, SNAP participation in Nevada grew by 252,084– growth was greater in urban counties (234,080; 5.1%) compared to rural and frontier counties (18,274; 4.8%) (Table 2.8).
- In 2023, 364,405 students or 86.1% of the total student population qualified for the Free and Reduced Lunch Program in Nevada, including 29,048 students or 69.5% of the total student population in rural and frontier counties (Table 2.9).
- Among rural and frontier counties of Nevada, students qualifying for the Free and Reduced Lunch Program ranged from 100.0% of the student population in Esmeralda County to 28.3% in Eureka County (Table 2.9).
- In 2024, there were 503,718 students enrolled in K-12 schools in Nevada (public and private), including 42,055 students enrolled in schools in rural and frontier areas of the state (Table 2.10).
- In 2024, the average public expenditure on education in Nevada was \$12,302 per pupil – among rural counties per pupil spending ranged from \$12,805 in Lyon County to \$34,439 in Eureka County (Table 2.11).
- In 2024, the average high school graduation rate in Nevada was 81.4% – the graduation rate ranged from 74.3% in Mineral County to 100.0% in Eureka County (Table 2.12).
- On average in 2024, the high school graduation rate in Nevada for females is 84.5%, compared to 78.4% for males (Table 2.12).
- In 2022, 12.9% of Nevadans aged 25 and older had not graduated from high school, 87.1% had a high school diploma or higher, and 26.5% had a bachelor’s degree or higher (Table 2.13).
- The percent of population aged 25 and over with a high school diploma was higher in rural and frontier areas of the state (89.0%) when compared to urban areas (86.9%), and the percent of population with a bachelor’s degree or higher was lower in rural areas (18.7%) versus urban areas (27.4%) (Table 2.13).
- In 2024, there were 2,042,607 registered voters out of an eligible voting population of 2,669,066 in Nevada (76.5%), including 199,208 registered voters in rural and frontier counties out of an eligible population of 253,895 (78.5%) (Table 2.14).
- The 2024 general election results underscore important differences between rural and urban parts of the state – turnout was higher in rural and frontier counties (79.9% of registered voters cast ballots) versus urban counties (72.1%) (Table 2.14).

- In the 2024 presidential election, rural and frontier counties voted heavily for the Republican candidate (71.7% of ballots cast for the president), while urban counties voted in greater percentages for the Democratic candidate (50.0%) (Table 2.15).
- In 2023, the most prevalent violent crime in Nevada was aggravated assault with 8,990 reported incidents. The most common property crime in Nevada was larceny/theft with 45,157 reported incidents (Tables 2.16 and 2.17).
- In 2023, the rate of reported violent crimes per 100,000 population in Nevada was 383.4 – county level rates ranged from 0.0 in Esmeralda and Lincoln Counties to 753.0 in Eureka County. Rural rates are lower than urban rates (Table 2.18).
- In 2023, the rate of reported property crimes per 100,000 population in Nevada was 2,344.7 – county level rates ranged from 0.0 in Esmeralda and Lincoln Counties to 2,619.3 in Clark County (Table 2.18).
- In 2023, there were 12,982 reported violent crimes and 79,395 reported property crimes in Nevada, including 751 violent crimes and 2,980 property crimes reported in rural and frontier counties (Tables 2.18).

Nevada Rural and Frontier Health Data Book

Section Three: Health Insurance Coverage in Rural and Frontier Nevada

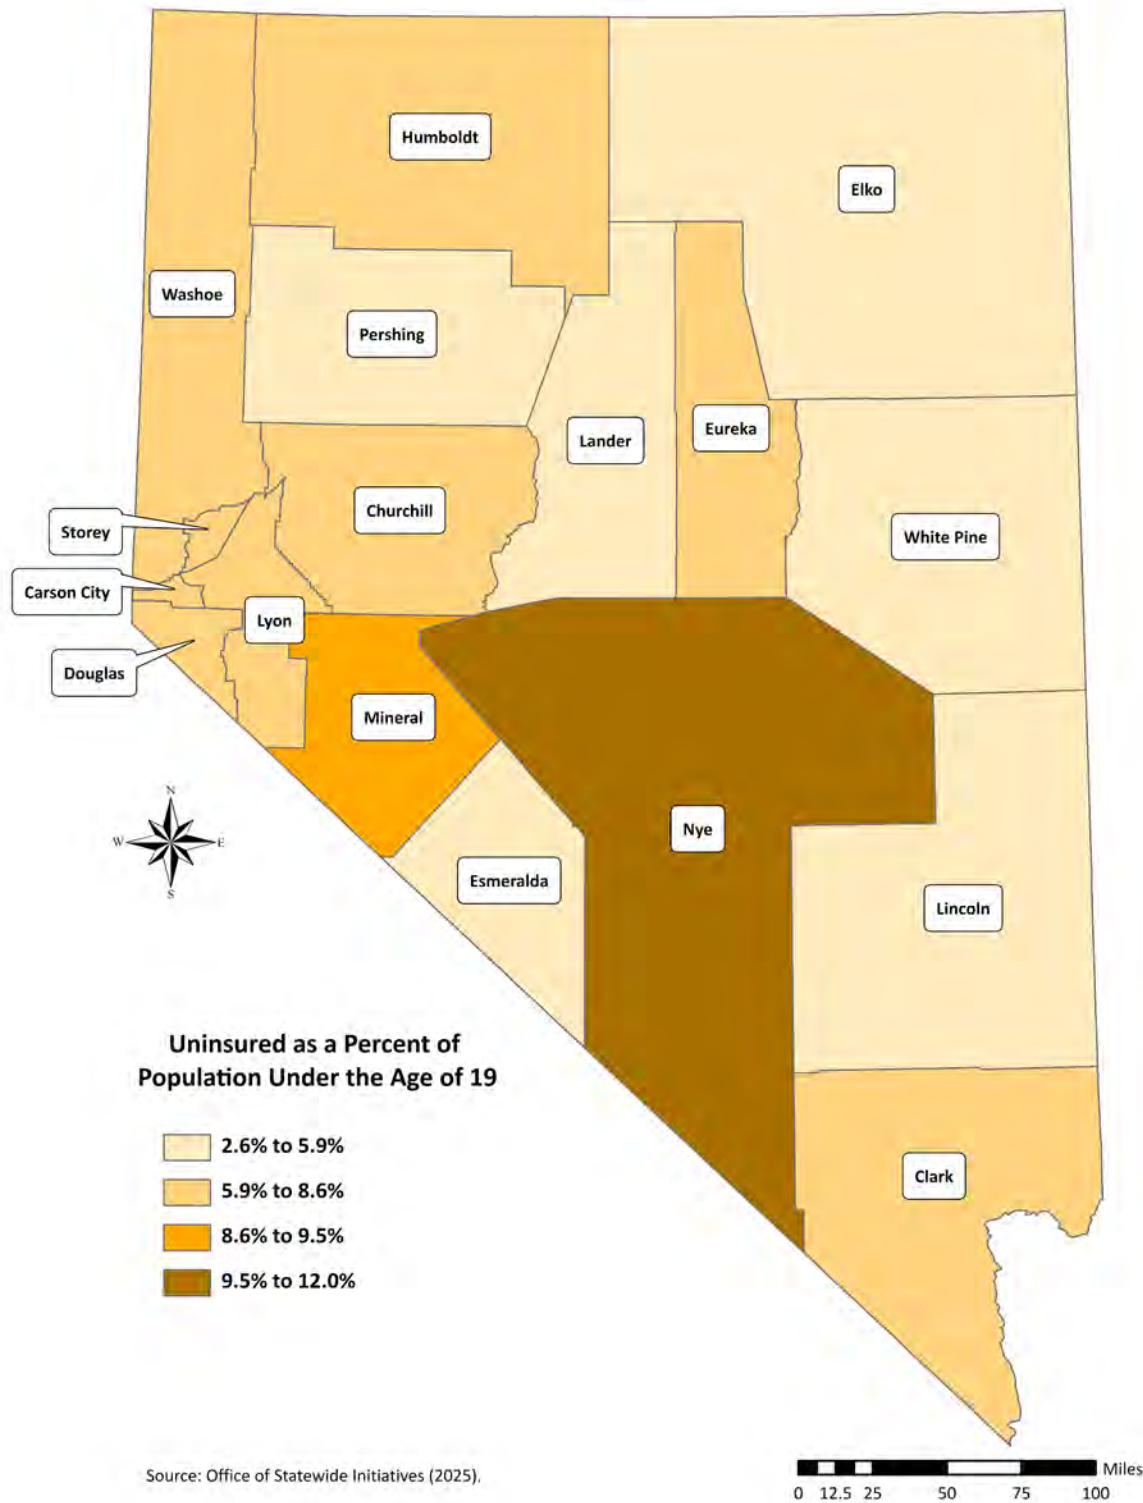

This section of the *Nevada Rural and Frontier Health Data Book – Twelfth Edition* provides a wide range of current data on health insurance coverage by county and region in Nevada. For additional data on health insurance coverage and trends, please visit the [Nevada Instant Atlas](#).

Highlights and key findings of this section include:

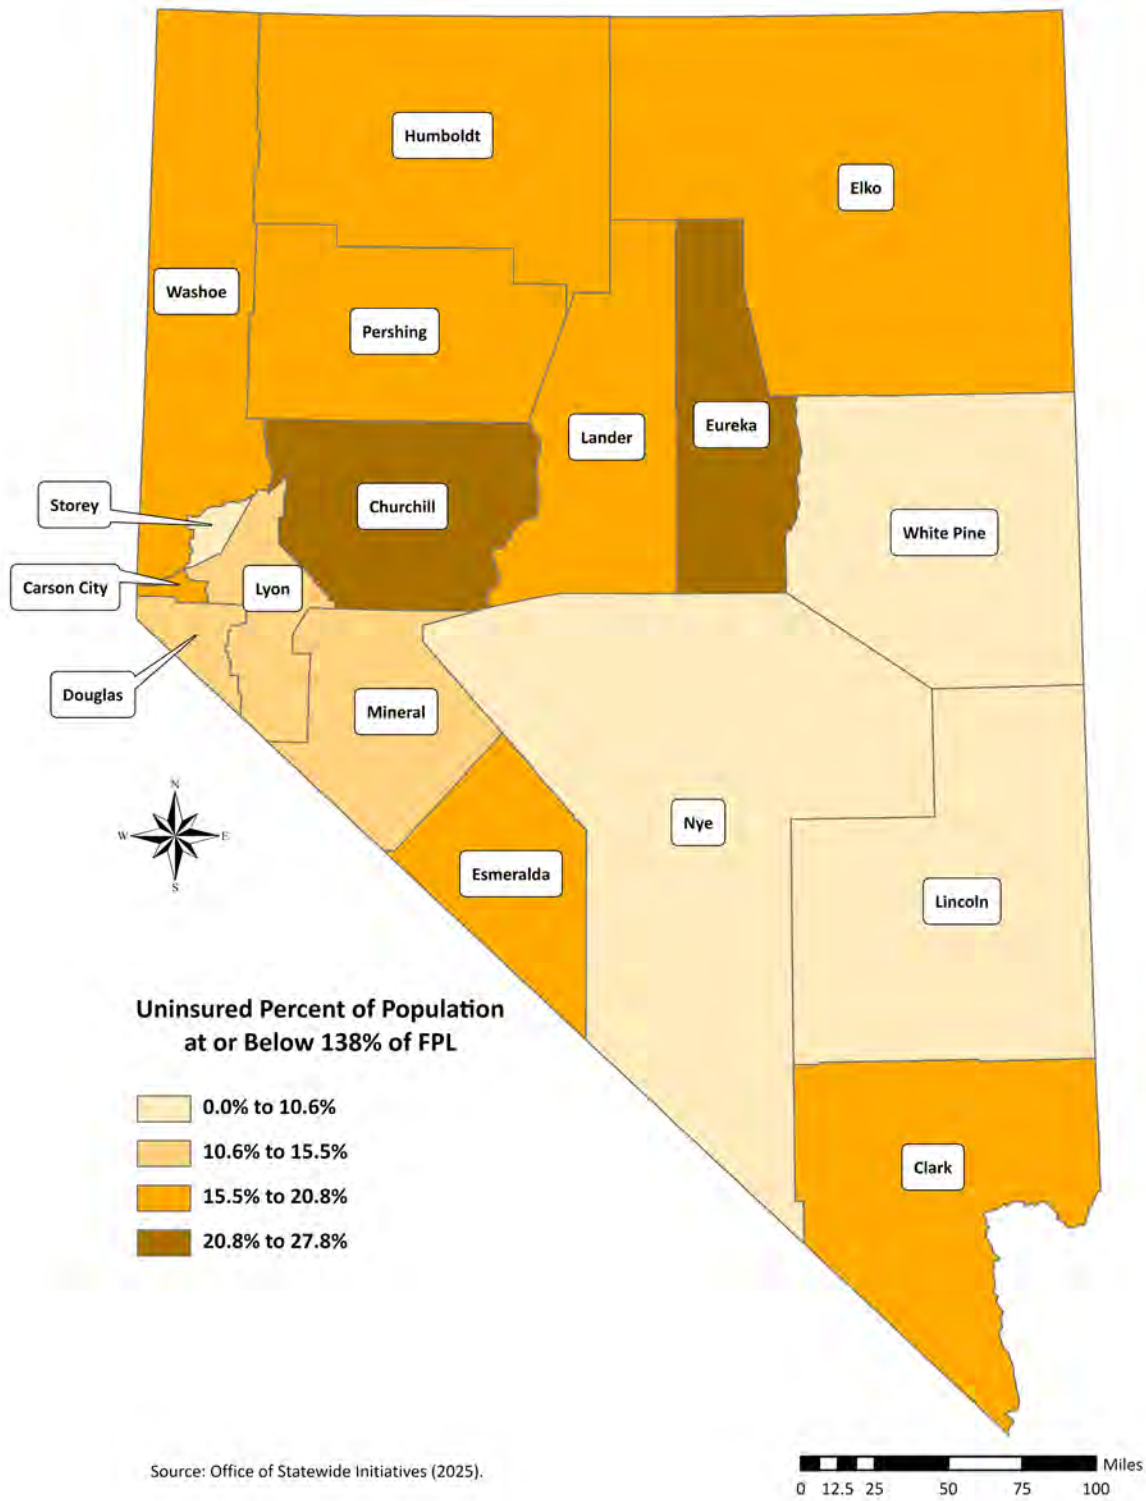

- In 2022, there were 348,409 uninsured Nevadans (11.4%), including 24,940 uninsured rural and frontier residents or 8.7% (Table 3.1).
- In 2022, 13.3% of Nevadans under the age of 65 were uninsured, including 11.0% rural and frontier residents (Table 3.2).
- Between 2012 and 2022, the number and percent of uninsured Nevadans under the age of 65 decreased by 74,211 or 17.8% – the number of uninsured Nevadans decreased in all 17 counties (Table 3.3).
- Over the past decade, the number and percent of uninsured Nevadans in rural and frontier counties decreased by 10,812 or 30.7% (Table 3.3).
- There were 57,590 uninsured Nevadans under the age of 19 (7.9%) in 2022, including 4,687 uninsured rural and frontier children (Table 3.4 and Map 3.1).
- In 2022, 107,229 Nevadans under the age of 65 and below 138% of the federal poverty level (FPL) were uninsured (18.2%) – including 7,559 rural and frontier residents under the age of 65 and living below 138% FPL (15.5%) (Table 3.5 and Map 3.2).
- Currently, there are 1,031,215 Nevadans enrolled in Medicaid, including 78,225 rural and frontier residents (Table 3.6 and Map 3.3).
- Between 2013 and 2023, Nevada Medicaid enrollment increased by 631,424 or 157.9%, including enrollment growth of 45,458 (138.7%) in rural and frontier counties (Table 3.6).
- Between 2013 and 2023, Nevada Check Up (Nevada’s Children’s Health Insurance Program) enrollment increased by 24,247 in urban counties and increased by 1,701 in rural and frontier counties (Table 3.7).

- Currently, there are 593,204 Nevadans enrolled in Medicare, including 76,981 rural and frontier residents. Of these, 289,958 Nevadans are enrolled in traditional Medicare while 303,246 are enrolled in Medicare Advantage (Table 3.8 and Map 3.4).
- Currently, there are 49,548 enrollees in traditional Medicare from the rural and frontier counties while 27,433 are enrolled in Medicare Advantage. Traditional Medicare enrollment in rural and frontier counties decreased in five counties, while enrollment in Medicare Advantage increased in 13 counties (Table 3.8 and Map 3.4).
- Figure 3.1 shows a decline in traditional Medicare and a growth in Medicare Advantage enrollment numbers in Nevada.
- Currently, there are a total of 457,567 Nevadans enrolled in Medicare Prescription Drug Plan (Part D) with 55,755 enrollees in rural and frontier counties (Table 3.9).
- From 2014 to 2024, the total number of Medicare Prescription Drug Plan (Part D) enrollees in Nevada increased by 177,678 (63.5%) – in rural and frontier counties the number of Medicare Prescription Drug Plan enrollees increased by 21,724 or 63.8% (Table 3.9).
- In 2024, there were 114,312 Nevadans enrolled in the Veterans Health Administration – this figure represents 70.0% of all veterans in Nevada. In rural and frontier Nevada, there were 15,021 (71.3%) veterans enrolled in the Veterans Health Administration (Table 3.10).
- During 2024, 88,285 veterans in Nevada used health care services delivered by the Veterans Health Administration – this figure represents 54.1% of all veterans in Nevada. In rural and frontier Nevada, 11,835 (56.2%) veterans used the Veterans Health Administration (Table 3.10).
- In 2024, there were 13 tribal health sites serving approximately 20,000 tribal residents in rural and frontier counties in Nevada (Table 3.11).

Nevada Rural and Frontier Health Data Book

Section Four: Population Health Profile of Rural and Frontier Nevada

This section of the *Nevada Rural and Frontier Health Data Book – Twelfth Edition* provides a wide range of current data on population health indicators by county and region in Nevada. For additional data on population health and trends, please visit the [Nevada Instant Atlas](#).

Highlights and key findings of this section include:

- Map 4.1 highlights geographic variation in factors affecting health status among Nevada’s seventeen counties. According to the County Health Rankings and Roadmaps project, the healthiest counties are Douglas (rural), Carson (urban), Storey (rural), and Washoe (urban). The least healthy counties are Pershing (rural), Mineral (rural), Nye (rural), and Clark (urban).
- Map 4.2 highlights geographic variation in health outcomes among Nevada’s seventeen counties. According to the County Health Rankings and Roadmaps project, the healthiest counties are Douglas (rural), Carson (urban), Pershing (rural), and Washoe (urban). The least healthy counties are all rural: Eureka, Lander, Mineral, and Nye.
- In general, the prevalence of adult diabetes increased over the past decade with rates slightly higher in rural versus urban counties. In 2021, diabetes prevalence rates ranged from 7.3% in Eureka County to 10.7% in Churchill County in rural areas and ranged from 7.5% in Washoe County to 9.8% in Clark County in urban areas (Table 4.1).
- Over the past decade, the prevalence of adult obesity increased in most counties of Nevada. In 2021, obesity prevalence ranged from 17.2% in Esmeralda County to 35.6% in Lyon County in rural areas and ranged from 25.8% in Washoe County to 31.1% in Carson City in urban areas (Table 4.2).
- In 2021, self-reported physical inactivity ranged from 13.9% in Esmeralda County to 21.2% in Elko county in rural areas and ranged from 17.5% in Washoe County to 21.4% in Clark County (Table 4.3).
- Over the past decade, adult smoking prevalence declined in 8 of Nevada’s counties. In 2024, 15.3% of adults in Nevada report that they currently smoke. Adult smoking prevalence ranges from 14.5% in Douglas County to 24.2% in Mineral County in rural and frontier areas (Table 4.4).
- In 2022, 14.9% of adults in Nevada reported excessive drinking. In rural and frontier areas, excessive drinking prevalence ranged from 13.1% in Esmeralda and Mineral Counties to 18.6% in Pershing County (Table 4.5).

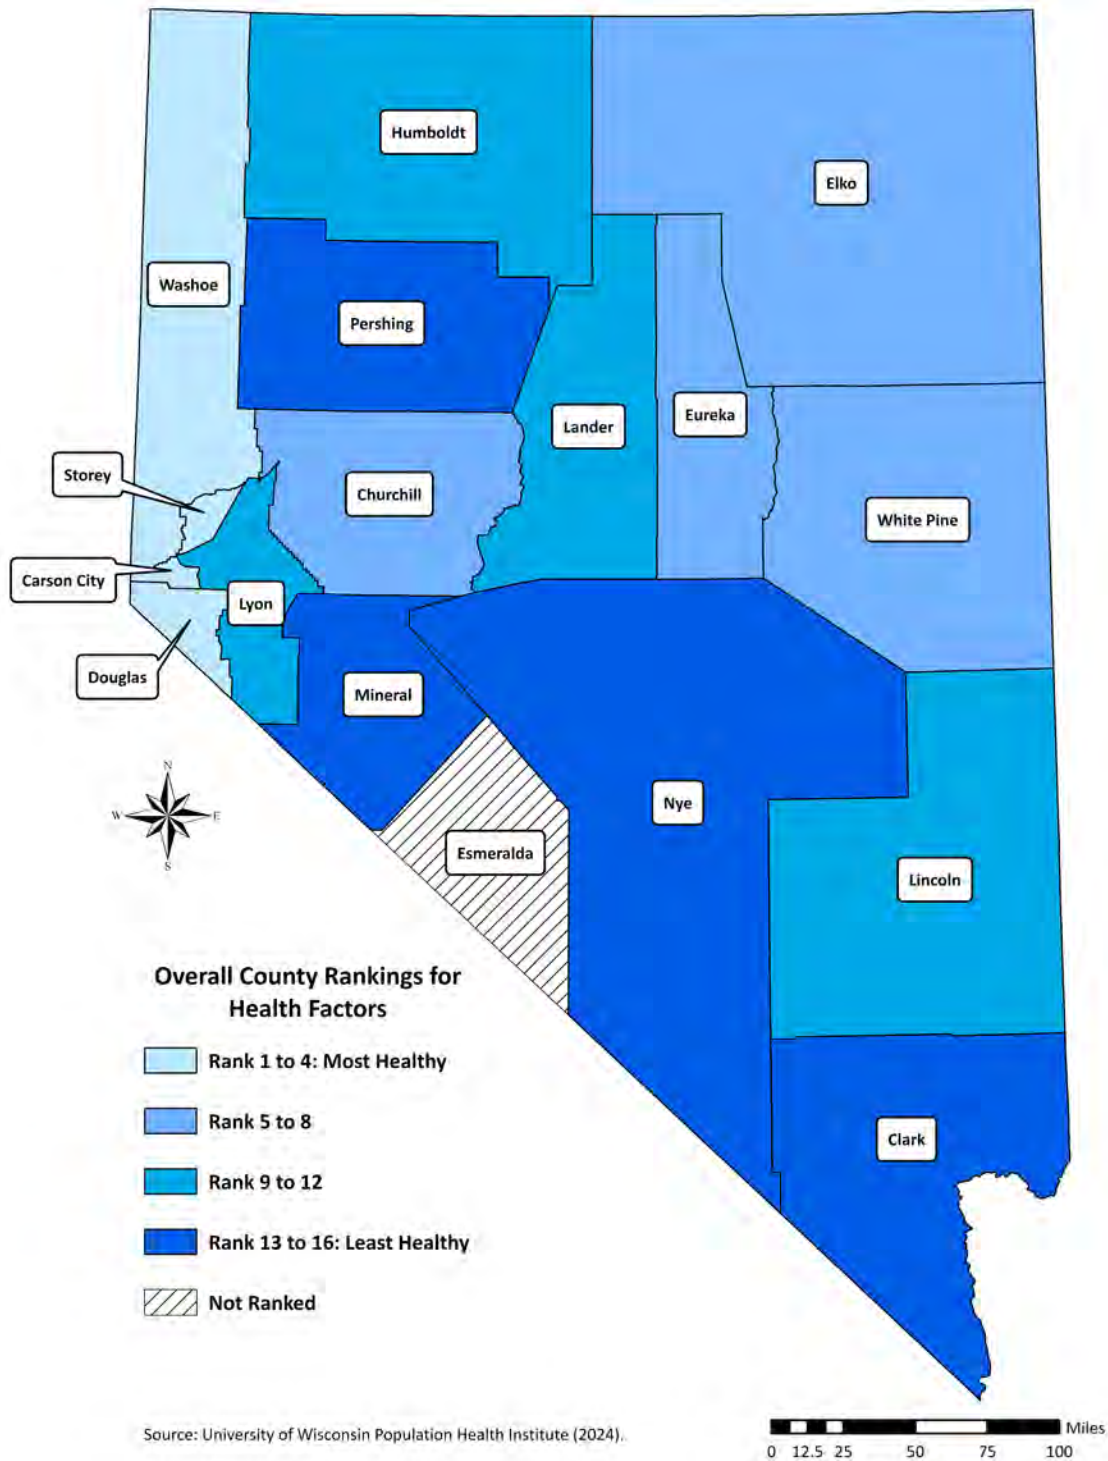

- Data from the Nevada High School Youth Risk Behavior Survey (YRBS) reveals that youth tobacco smoking in Nevada has dropped to 2.9% of students, however 33.6% of students have used vaping products (Table 4.6).
- According to the YRBS, 20.1% of high school students are sexually active. Sexual activity prevalence rates are generally higher in rural and frontier areas of the state, as compared to urban areas. For example, 24.8% of students in Douglas County are sexually active in contrast to 18.4% in Clark County (Table 4.7).
- According to the YRBS, nearly 1 in 7 high school students report being bullied online (13.8%), 11.1% of students report being forced to have sex, and 3.8% reported carrying a gun (Table 4.8).
- The National Survey on Drug Use and Health administered by the U.S. Substance Abuse and Mental Health Services Administration (SAMHSA) yields current data on a wide-range of self-reported mental health and substance abuse indicators by region in Nevada and the United States. This data indicates Nevada prevalence rates for adults (18 and older) that are significantly higher than national rates in key areas, such as illicit drug use and marijuana use (Table 4.9).
- From 2012 to 2022, the number of new cases of HIV increased in Clark County and in other regions of Nevada. The new cases of AIDS decreased in all regions of the state. The prevalence of HIV/AIDS increased in all regions (Table 4.10).
- Between 2012 and 2022, sexually transmitted diseases (STDs) – syphilis, gonorrhea, and chlamydia – increased substantially in Nevada and across all regions of the state. However, STD rates are generally lower in rural versus urban areas of the state. For example, the chlamydia rate in rural and frontier counties (247.4 new cases per 100,000 population) is lower than Clark County (486.4) and Washoe County (536.7) (Tables 4.11 and 4.12).
- Nevada’s gonorrhea rates increased from 2012 to 2022, rising from 82.0 in 2012 to 230.7 in 2022 (Table 4.13).
- From 2012 to 2022, chlamydia rates in Nevada has increased with rates being 395.0 in 2012 to 505.3 in 2022 (Table 4.14).
- New cases of tuberculosis (TB) and TB rates continue to decline in all regions of the state and are much lower in rural areas of Nevada (Table 4.15).
- Data on maternal behaviors and birth outcomes indicate substantial barriers faced by women seeking prenatal care in rural areas that translate into low birth weight babies and premature births. The percent of women receiving prenatal care in the first trimester ranges from 50.0% in Esmeralda County (rural) to 78.1% in Clark County (Urban) (Table 4.16).

- There is little regional variation in infant mortality rates across rural and urban areas of the state. However, the infant mortality rate in Carson City (8.1 infant deaths per 1,000 live births) is substantially higher than the rural (3.4 infant deaths per 1,000 live births) and state averages (4.6 infant deaths per 1,000 live births) (Table 4.17).
- Over the past ten years, the birth rate declined in 15 of 17 counties, including 12 rural and frontier counties. The highest birth rate was in Humboldt county (Tables 4.18).
- Teen pregnancy rates continue to decline in both rural and urban areas of the state. However, over the past ten years teen pregnancy rates rose in two rural counties (Lyon and Storey) and declined in all three urban counties (Tables 4.19).
- Over the past ten years, the teen birth rates declined or remained flat in 16 of 17 counties in Nevada. The birth rate increased in Lincoln County (Tables 4.20).
- The Nevada Department of Education (NDOE) collects data on childhood disabilities by county of residence, including data on autism spectrum disorders, learning disabilities, and speech/language/hearing impairment. In 2024, there were 158.8 disabled children per 1,000 enrolled students in Nevada. Childhood disability rates range from 122.5 in Storey County to 191.8 in Pershing County. Charter schools had the lowest rate at 105.5 (Table 4.21).
- In 2022, the age-adjusted mortality rate for all causes of death in Nevada was 858.2 deaths per 100,000 population – rates increased in all 17 counties since 2012 and currently range from 691.8 in Douglas County to 1,333.6 in Eureka County (Table 4.22).
- The age-adjusted mortality rate for all causes of death in Nevada increased from 758.0 deaths per 100,000 population in 2012 to 858.2 deaths per 100,000 population in 2022, an increase of 100.2 deaths per 100,000 population or 13.2% increase. (Table 4.22)
- In 2022, the age-adjusted mortality rate for heart disease in Nevada was 202.1 deaths per 100,000 population – rates decreased in 5 of 17 counties since 2012 and currently range from 87.9 in Storey County to 358.6 in Lander County (Table 4.23).
- The age-adjusted mortality rate for heart disease in Nevada increased from 188.4 deaths per 100,000 population in 2012 to 202.1 deaths per 100,000 population in 2022, an increase of 13.7 deaths per 100,000 population or 7.3%. (Table 4.23).
- In 2022, the age-adjusted mortality rate for malignant neoplasms (cancer) in Nevada was 142.3 deaths per 100,000 population – rates declined in 11 of 17 counties since 2012 and currently range from 88.9 in Humboldt County to 203.8 in Mineral County (Table 4.24).

- The age-adjusted mortality rate for malignant neoplasms (cancer) in Nevada decreased from 158.8 deaths per 100,000 population in 2012 to 142.2 deaths per 100,000 population in 2022, a decrease of 16.6 per 100,000 population or 10.5%. (Table 4.24).
- In 2022, the age-adjusted mortality rate for chronic lower respiratory disease in Nevada was 44.5 deaths per 100,000 population – rates declined in 8 counties since 2012 and currently range from 10.8 in Lander County to 204.9 in Eureka County (Table 4.25).
- The age-adjusted mortality rate for chronic lower respiratory disease in Nevada decreased from 51.2 deaths per 100,000 population in 2012 to 44.5 deaths per 100,000 population in 2022, a decrease of 6.7 deaths per 100.000 population or 13.1%. (Table 4.25).
- In 2022, the age-adjusted mortality rate for lung, trachea, and bronchus cancer in Nevada was 28.5 deaths per 100,000 population – rates declined in 10 counties since 2012 and currently range from 12.2 in White Pine County to 59.5 in Mineral County (Table 4.26).
- The age-adjusted mortality rate for lung, trachea, and bronchus cancer in Nevada decreased from 45.0 deaths per 100,000 population in 2012 to 28.5 deaths per 100,000 population in 2022, a decrease of 16.5 deaths per 100,000 population or 36.7%. (Table 4.26).
- In 2022, the age-adjusted mortality rate for cerebrovascular disease (stroke) in Nevada was 41.0 deaths per 100,000 population – rates decreased in 4 counties since 2012 and currently range from 8.0 in Elko County to 62.0 in Washoe County (Table 4.27).
- The age-adjusted mortality rate for cerebrovascular disease (stroke) in Nevada increased from 33.4 deaths per 100,000 population in 2012 to 41.0 deaths per 100,000 population in 2022, an increase of 7.6 deaths per 100,000 population or 22.8%. (Table 4.27).
- In 2022, COVID-19 was the third leading cause of death in Nevada. Heart disease and cancer continue to be the leading causes of death in the state (Table 4.28).
- Major causes of death and mortality rates vary considerably by region. For example, age-adjusted suicide and chronic lower respiratory diseases mortality rates are higher in rural and frontier regions than urban (Table 4.28).
- From 2012 to 2022, age-adjusted death rates for the major causes of death – cancer, chronic lower respiratory diseases, influenza and pneumonia – were flat or declined in Nevada. Noteworthy exceptions included increased death rates from essential hypertensive renal disease (100.0%), Alzheimer’s (73.0%), homicide (63.6%), and diabetes (54.2%) (Table 4.29). COVID-19 was not established before 2019.

- In 2022, the ten leading causes of death in rural and frontier Nevada were: (1) heart disease; (2) malignant neoplasms (cancer); (3) chronic lower respiratory; (4) COVID-19; (5) unintentional accidents; (6) cerebrovascular diseases (stroke); (7) lung, trachea, and bronchus cancer; (8) intentional self-harm (suicide); (9) diabetes mellitus; (10) transport accidents – all of which vary across regions and to the U.S. rankings (Table 4.30).
- In Nevada, there are substantial differences in birth rates, life expectancy, and mortality rates across racial and ethnic groups – differences that persist across all regions of the state. For instance, the birth rate for Whites is 18.6 per 1,000 population, as compared to 41.9 for Blacks in Nevada (Tables 4.31 and 4.32).

Nevada Rural and Frontier Health Data Book

Section Five: Health Care Workforce in Rural and Frontier Nevada

This section of the *Nevada Rural and Frontier Health Data Book – Twelfth Edition* provides a wide range of current data on the health workforce by county and region in Nevada. For additional data on the health care workforce and trends, please visit the [Nevada Instant Atlas](#).

Highlights and key findings of this section include:

- Between 2023 and 2024, unemployment rates dropped steadily and ranged from 4.3% in White Pine County to 8.0% in Nye County (Table 5.1).
- Over the past decade – particularly during the pandemic – the unemployment rate in Nevada has consistently been higher than that of the United States, and urban unemployment rates have typically been higher than that of the rural areas of the state (Table 5.2).
- There is considerable variation in unemployment rates across rural and frontier counties – typically, mining counties have lower unemployment rates than non-mining counties (Table 5.2).
- In 2023, there were an estimated 152,719 Nevadans employed in the health care industries, including 7,169 in rural and frontier counties (Table 5.3).
- In 2023, Nevadans employed in the health care industries earned \$9.9 billion in payroll, including \$422.6 million in rural Nevada (Table 5.4).
- There are an estimated 180,688 Nevadans employed in the health care and social assistance sector, including 81,081 employed in ambulatory health care services (44.9%), 48,533 employed in hospitals (26.9%), 19,766 employed in nursing and residential care facilities (10.9%), and 31,309 in social assistance (17.3%) (Table 5.5).
- There are an estimated 7,562 individuals employed in the health care and social services sector in rural and frontier counties, including 3,979 employed in ambulatory health care services (52.6%), 1,543 employed in hospitals (20.5%), 805 employed in nursing and residential care facilities (10.6%), and 1,235 in social assistance (16.3%) (Table 5.5).
- In 2030, 195,647 Nevadans are projected to be employed in the health care and social services sector – an increase of 14,959 jobs from 2025 (8.3%) (Table 5.5 and Table 5.6).
- In 2030, 7,635 rural and frontier Nevadans are projected to be employed in the health care and social services sector – an increase of 73 jobs from 2025 (1.0%) (Table 5.5 and 5.6).

- There are 6,230 licensed allopathic physicians (MDs) in Nevada or 189.4 MDs per 100,000 population, including 219 licensed MDs in rural and frontier counties or 69.3 MDs per 100,000 population (Table 5.7).
- Over the past decade, the number of licensed MDs in Nevada increased from 4,874 in 2014 to 6,230 in 2024 – an increase of 1,356 or 27.8%. The number of licensed MDs per 100,000 population in Nevada increased from 171.4 in 2014 to 189.4 in 2024 (Table 5.7).
- However, the number of MDs per 100,000 population in rural and frontier counties declined from 73.1 to 69.3 during the same period (Table 5.7).
- There are 1,337 licensed osteopathic physicians (DOs) in Nevada, including 63 DOs in rural and frontier counties – since 2014, the number of DOs in Nevada increased by 745 or 124.7% and the per 100,000 population of DOs has grown from 20.9 to 40.6 per 100,000 population (Table 5.8).
- There are 3,141 licensed primary care physicians in Nevada (2,540 MDs and 601 DOs), including 119 primary care physicians (87 MDs and 32 DOs) in rural and frontier counties (Table 5.9).
- The number of primary care physicians in rural and frontier counties is 60.1 per 100,000 population, as compared to 101.2 per 100,000 population in urban areas (Table 5.9).
- There are 1,266 licensed physician assistants (PAs) in Nevada, including 85 PAs in rural and frontier counties – the number of PAs in rural and frontier counties is 26.9 per 100,000 population, as compared to 39.7 per 100,000 population in urban areas (Table 5.10).
- Over the past decade, the number of physician assistants (PAs) in Nevada increased from 661 in 2014 to 1,266 in 2024 (91.5%) and the per 100,000 population number of PAs in Nevada increased from 20.2 to 38.5 during the same period (90.6%) (Table 5.10).
- There are 3,507 advanced practitioners of nursing (APNs) in Nevada, including 155 APNs in rural and frontier counties – the number of APNs in rural and frontier counties is 49.1 per 100,000 population, as compared to 112.7 per 100,000 population in urban areas (Table 5.11).
- Over the past decade, the number of APNs in Nevada increased from 901 in 2014 to 3,507 in 2024 (289.2%) and the number per 100,000 population of APNs in Nevada increased from 31.7 to 106.6 during the same period (Table 5.11).
- In rural and frontier counties, the number of APNs per 100,000 population increased from 19.8 to 49.1 (148.0%) (Table 5.11).
- Over 2,500 APNs in Nevada have a population focus in adult/family care, 462 APNs in geriatrics, and 401 in psychiatric care – the vast majority of APNs in these three areas practice in Washoe and Clark Counties (Table 5.12).

- There are 33,875 licensed registered nurses (RNs) who reside in Nevada – including 1,906 RNs in rural and frontier counties (Table 5.13).
- Over the past decade, the number of licensed registered nurses (RNs) increased from 21,563 in 2014 to 33,875 in 2024 (an increase of 12,312 or 57.1%) and the number per 100,000 population of RNs in Nevada increased from 762.3 to 1,029.8 during the same period (35.1%) (Table 5.13).
- The number of RNs per 100,000 population ranges from 66.2 in Storey County to 1,183.9 in Washoe County – the average for rural and frontier counties is 603.3 RNs per 100,000 population, as compared to 1,075.1 in urban counties (Table 5.13).
- There are 3,638 licensed practical nurses (LPNs) in Nevada, including 250 LPNs in rural and frontier counties – since 2014, the number of LPNs in Nevada increased by 661 or 22.2% (Table 5.14).
- There are 158 certified registered nurse anesthetists (CRNAs) in Nevada, including 21 CRNAs in rural and frontier counties – since 2014, the number of CRNAs in Nevada increased by 72 or 83.7% and the number of CRNAs increased from 3.0 to 4.8 per 100,000 population. In rural and frontier counties, the number per 100,000 population increased from 5.3 to 6.6 (Table 5.15).
- There are 180 registered nurses with emergency medical services certification (EMS-RNs) in Nevada, including 42 EMS-RNs in rural and frontier counties – 23.3% of EMS-RNs work in rural and frontier counties (Table 5.16).
- There are 9,475 certified nursing assistants (CNAs) in Nevada, including 958 CNAs in rural and frontier counties – since 2014, the number of CNAs in Nevada increased by 1,612 or 20.5% (Table 5.17).
- There are 2,102 licensed dentists in Nevada, including 106 dentists in rural and frontier counties. Over the past decade, the number of licensed dentists increased from 1,553 in 2014 to 2,102 in 2024 (35.4%) and the number of dentists in Nevada decreased from 54.9 to 63.9 per 100,000 population during the same period (Table 5.18).
- Over the past decade, the number of dentists has declined in rural and frontier areas from 38.0 to 33.6 per 100,000 population (Table 5.18).
- There are 1,348 licensed registered dental hygienists in Nevada, including 130 dental hygienists in rural and frontier counties – since 2014, the number of dental hygienists in Nevada increased by 275 or 25.0% (Table 5.19).
- There are 810 licensed alcohol, drug, and gambling counselors in Nevada, including 93 in rural and frontier counties – there are 24.1 counselors per 100,000 population in urban counties and 29.4 counselors in rural and frontier counties (Table 5.20).

- There are 1,471 licensed marriage and family therapists (MFTs) in Nevada, including 71 MFTs in rural and frontier counties – since 2014, the number of MFTs in Nevada increased by 780 or 125.8% (Table 5.21).
- There are 953 licensed clinical professional counselors (CPCs) in Nevada, including 54 CPCs in rural and frontier counties – since 2014, the number of CPCs in Nevada increased by 880 and the number per 100,000 population increased from 2.6 to 29.0 (Table 5.22).
- There are 285 licensed psychiatrists in Nevada – 280 are in urban Nevada and only 5 psychiatrists are in a rural or frontier county (Table 5.23).
- Since 2014, the number of psychiatrists in Nevada increased by 116 or 68.6%, and the number of psychiatrists increased from 6.4 to 8.6 per 100,000 population (Table 5.23).
- There are 508 licensed psychologists in Nevada, including 13 in rural and frontier counties – since 2014, the number of psychologists in Nevada increased by 135 or 36.2%, the number of psychologists has increased from 13.1 to 15.4 per 100,000 population (Table 5.24).
- There are 3,405 licensed applied behavior analysts and technicians in Clark and Washoe Counties. There are only 173 licensed applied behavior analysts and technicians in rural and frontier Nevada (Table 5.25).
- There are 1,619 licensed clinical social workers (LCSWs) in Nevada, including 106 LCSWs in rural and frontier counties – there are 33.6 LCSWs per 100,000 population in rural and frontier counties as compared to 50.9 in urban counties (Tables 5.28).
- There are 2,642 licensed pharmacists in Nevada, including 138 pharmacists in rural and frontier counties (Table 5.29).
- Over the past decade, the number of licensed pharmacists increased from 2,217 in 2014 to 2,642 in 2024 (19.2%). The number per 100,000 population of pharmacists in Nevada increased from 78.4 to 80.7 during the same period (Table 5.29).
- There are 1,831 licensed pharmaceutical technicians in Nevada, including 127 pharmaceutical technicians in rural and frontier counties (Table 5.30).
- There are 704 licensed chiropractors in Nevada, including 45 chiropractors in rural and frontier counties – since 2014, the number of chiropractors in Nevada increased by 111 or 18.7% (Table 5.31).
- There are 596 registered dietitians (RDs) in Nevada, including 34 RDs in rural and frontier counties – only 5.7% of RDs work in rural and frontier counties (Table 5.32).

- There are 1,962 paramedics in Nevada, including 254 paramedics in rural and frontier counties (Table 5.33).
- There are 59.6 paramedics per 100,000 population in Nevada – the number of paramedics per 100,000 population in rural and frontier counties is 80.4, as compared to 57.4 in urban counties (Table 5.34).
- There are 5,106 licensed massage therapists in Nevada, including 231 licensed massage therapists in rural and frontier counties (Table 5.35).
- Across all types of licensed medical laboratory personnel – laboratory directors, supervisors, technologists, technicians, and assistants – the number per 100,000 population in rural areas of Nevada are lower than those of urban areas. For example, there are 322.9 laboratory assistants per 100,000 population in rural and frontier counties versus 448.7 in urban counties (Table 5.36 and Table 5.37).
- There are 1,081 occupational therapists (OTs) in Nevada, including only 50 in rural and frontier counties. Since 2014, the number of OTs in Nevada increased by 511 or 89.6% and the number of OTs has grown from 20.1 to 32.9 per 100,000 population (Table 5.38).
- There are 378 occupational therapy assistants (OTAs) in Nevada, including only 14 OTAs in rural and frontier counties – since 2014, the number of OTAs in Nevada increased by 207 or 121.1% and the number of OTAs has grown from 6.0 to 11.5 per 100,000 population (Table 5.39).
- There are 514 licensed optometrists in Nevada, including 32 optometrists in rural and frontier counties – since 2014, the number of licensed optometrists in Nevada increased by 128 or 33.2% and the number of optometrists increased from 13.6 to 15.6 per 100,000 population (Table 5.40).
- There are 338 licensed dispensing opticians in Nevada, including 9 opticians in rural and frontier counties. Since 2012, the number of licensed dispensing opticians in Nevada increased by 62 or 22.5% and the number of opticians per 100,000 population has grown from 10.0 in 2012 to 10.5 in 2022 (Table 5.41).
- There are 149 licensed dispensing optician apprentices in Nevada, including 7 optician apprentices in rural and frontier counties (Table 5.42).
- There are 1,159 physical therapists (PTs) in Nevada, including 79 PTs in rural and frontier counties – since 2014, the number of PTs in Nevada increased by 88 or 8.0% and the number of PTs has decreased from 38.0 to 35.3 per 100,000 population (Table 5.43).
- There are 412 physical therapy assistants (PTAs) in Nevada, including 24 PTAs in rural and frontier counties – since 2014, the number of PTAs in Nevada increased by 110 or 36.4% and the number of PTAs has grown from 10.7 to 12.5 per 100,000 population (Table 5.44).

- There are 132 licensed podiatrists in Nevada or 4.0 licensed podiatrists per 100,000 population, including 8 licensed podiatrists in rural and frontier counties (Table 5.45).
- There are 1,327 registered respiratory therapists (RRTs) and 323 certified respiratory therapists (CRTs) in Nevada, including 43 RRTs and 19 CRTs in rural and frontier counties (Table 5.46).
- There are 1088 licensed speech-language pathologists in Nevada, including 55 in rural and frontier counties – since 2012, the number of speech-language pathologists in Nevada increased by 424 or 63.9% and the number per 100,000 population increased from 26.3 to 33.1 (Table 5.47).
- In general, the number of licensed health professionals per 100,000 population is lower in rural and frontier counties of Nevada versus urban areas of the state – important exceptions include registered nurse anesthetists, registered dental hygienists, and alcohol, drug and gambling counselors (Table 5.48).
- Currently, there are approximately 2.2 million Nevadans or 64.9% of the state’s population reside in a federally-designated primary medical care health professional shortage area (HPSA) – 12 of 17 counties in Nevada are single-county primary medical care HPSAs (Table 5.49 and Map 5.1).
- An estimated 280,704 residents of rural and frontier Nevada (89.2% of the population) live in a primary medical care health professional shortage area (HPSA) – 11 of 14 rural and frontier counties in Nevada are single-county primary medical care HPSAs (Table 5.49 and Map 5.1).
- Currently, an estimated 1.9 million Nevadans or 58.2% of the state’s population reside in a federally designated dental health professional shortage area (HPSA) – 12 of 17 counties in Nevada are single-county dental HPSAs (Table 5.49 and Map 5.2).
- An estimated 259,627 residents of rural and frontier Nevada (82.5% of the population) live in a dental health professional shortage area (HPSA) – 11 of 14 rural and frontier counties in Nevada are single-county dental HPSAs (Table 5.49 and Map 5.2).
- Currently, 3.0 million Nevadans or 91.3% of the state’s population reside in a federally designated mental health professional shortage area (HPSA) – 15 of 17 counties in Nevada are single-county mental HPSAs (Table 5.49 and Map 5.3).
- An estimated 314,836 residents of rural and frontier Nevada (100% of the population) live in a mental health professional shortage area (HPSA) – all 14 rural and frontier counties in Nevada are single-county mental HPSAs (Table 5.49 and Map 5.3).

Table 5.1: Unemployment Rate in Nevada by County – July 2023 to July 2024

Nevada Rural and Frontier Health Data Book

Section Six: Health Care Resources and Economics in Rural and Frontier Nevada

This section of the *Nevada Rural and Frontier Health Data Book – Twelfth Edition* provides a wide range of current data on health care resources, finances, and utilization by county and region in Nevada. For additional data and trends, please visit the [Nevada Instant Atlas](#).

Highlights and key findings of this section include:

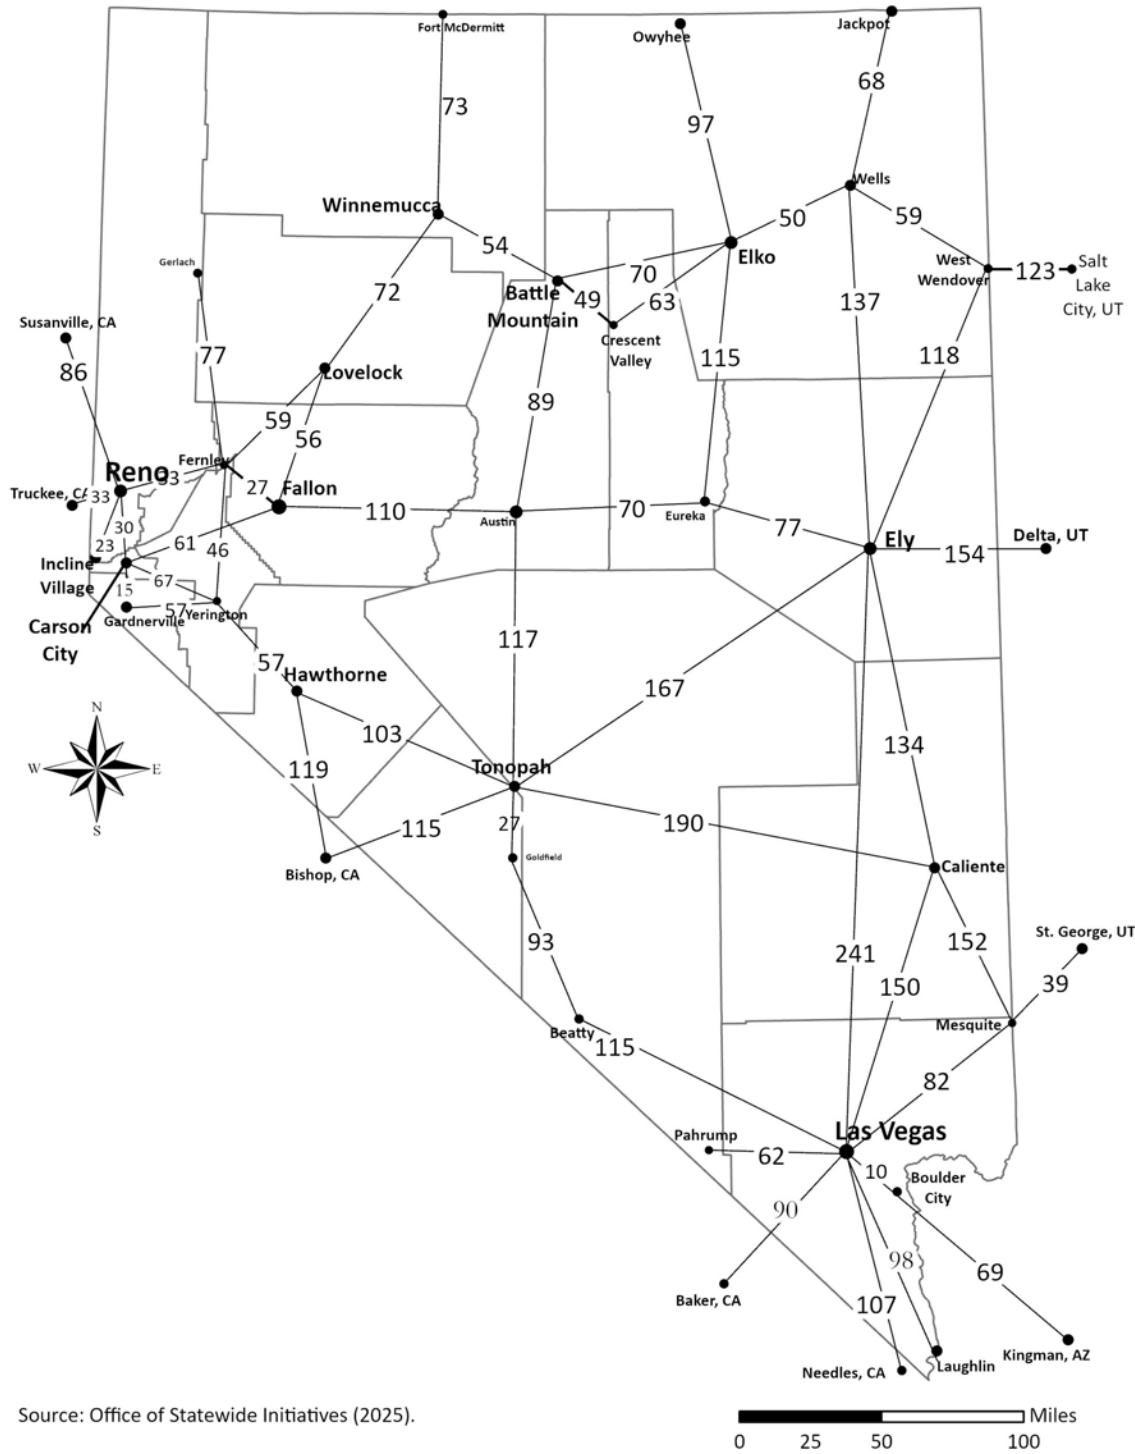

- On average, Nevada’s 14 rural and frontier hospitals are 56 miles from the nearest hospital and 109 miles from the nearest tertiary care hospital (Table 6.1 and Map 6.1).
- Currently, there are 14 rural and frontier hospitals in Nevada serving an estimated population of 287,228 residents scattered over 95,431 square miles (3.0 persons per square mile) – 13 of these facilities are federally designated Critical Access Hospitals (CAHs) (Map 6.2).
- In 2025, there are 301 licensed community hospital beds in rural and frontier hospitals (Table 6.2).
- Currently, there are 7,408 licensed community hospital beds in Nevada, including 247 licensed community hospital beds in rural and frontier counties (Table 6.3).
- Currently, there are 2.3 licensed community hospital beds per 1,000 population in Nevada – there are 0.8 licensed community hospital beds per 1,000 population in rural and frontier counties, as compared to a rate of 2.3 in urban counties (Table 6.3).
- There are currently 6,845 licensed skilled nursing beds in Nevada, including 706 licensed skilled nursing beds in rural and frontier counties (Table 6.4).
- Currently, there are 12.5 licensed skilled nursing beds per 1,000 population age 65+ in Nevada – there are 9.9 licensed skilled nursing beds per 1,000 population aged 65+ in rural and frontier counties, as compared to a rate of 12.9 in urban counties (Table 6.4 and 6.5).
- Nevada’s 14 rural and frontier hospitals had a combined 2,485 employees (FTE) and payroll of \$198.3 million – these hospitals had an average annual salary of \$82,994 (Table 6.6).
- Nevada’s 25 urban acute care hospitals had a total 27,164 employees (FTE) and payroll of \$2.4 billion – urban hospitals had an average annual salary of \$85,089 (Table 6.7).

- Nevada’s 14 rural and frontier hospitals employed 2,470 individuals in 2023 – when the jobs created in other businesses resulting from hospital spending are included in the analysis rural and frontier hospitals were responsible for an additional 1,242 jobs for a total employment impact of 3,712 jobs (Table 6.8).
- In 2025, Nevada’s 25 urban hospitals employed 4,692 individuals – when the jobs created in other businesses resulting from hospital spending are included in the analysis urban hospitals were responsible for an additional 22,222 jobs for a total employment impact of 48,750 jobs (Table 6.8).
- Nevada’s 14 rural and frontier hospitals had payroll of \$198.3 million in 2023 – when the income created in other businesses resulting from hospital spending is included in the analysis, rural and frontier hospitals were responsible for an additional secondary income impact of \$66.7 million for a total payroll impact of \$265.0 million (Table 6.9).
- In 2023, Nevada’s 25 urban hospitals had payroll of \$3.6 billion – when the income created in other businesses resulting from hospital spending is included in the analysis, urban hospitals were responsible for an additional \$2.2 billion for a total payroll impact of \$5.8 billion (Table 6.9).
- In 2023, there were 152,730 Nevadans employed in the health sector with a payroll of \$9.9 billion, including 7,342 rural and frontier residents with a combined payroll of \$371.5 million (Tables 6.10 and 6.11).
- Nevada’s health sector employed 152,730 individuals in 2023 – when the jobs created in other non-health sector businesses because of health sector operating activity are included in the analysis, Nevada’s health sector was responsible for an additional 154,658 jobs for a total employment impact of 307,388 jobs (Table 6.10).
- In 2023, the health sector in rural and frontier counties of Nevada employed 7,342 individuals – when the jobs created in other non-health sector businesses, resulting from health sector operating activity, are included in the analysis, the rural health sector was responsible for an additional 4,189 jobs for a total employment impact of 11,531 jobs (Table 6.10).
- Nevada’s health sector had a combined payroll of \$9.9 billion in 2023 and when the income created in other non-health sector businesses, resulting from health sector operating activity, is included in the analysis, Nevada’s health sector was responsible for an additional \$5.8 billion in personal income for a total payroll impact of \$15.7 billion (Table 6.11).
- The health sector in rural Nevada had a combined payroll of \$371.5 million and when the income created in other non-health sector businesses, resulting from of health sector operating activity, is included in the analysis, the rural Nevada health sector was responsible for an additional \$134.8 million in personal income for a total payroll impact of \$506.4 million (Table 6.11).

- Currently, there are 14 rural and frontier hospitals in Nevada: 6 are not-for-profit publicly owned hospitals; 4 not-for-profit privately-owned hospitals; 3 for-profit privately-owned hospitals; and 1 not-for-profit non-governmental hospital (Table 6.12).
- There are 14 rural and frontier community hospitals in Nevada with 20 provider-based rural health clinics (RHCs). There are also 8 non-hospital based Federally Qualified Health Clinics (FQHCs), and 13 tribal and Indian Health Service (IHS) clinics and health centers (Tables 6.13 through 6.15).
- Nevada's 14 rural and frontier hospitals had a combined 8,283 admissions, 33,906 inpatient days, an average stay of 4.1 days, an average daily census of 93.0, and an occupancy rate of 32.8% (Table 6.16).
- Rural and frontier hospitals had \$288.1 million in inpatient revenue and \$1.0 billion in outpatient revenue totaling \$1.3 billion in total revenue. Outpatient revenue averaged 78.2% of total revenue (Table 6.17).
- Nevada's 14 rural and frontier hospitals in Nevada collectively reported an operating income of \$13.2 million. When Northeastern Nevada Regional Hospital is excluded from the analysis, the remaining 13 rural and frontier hospitals in Nevada collectively reported an operating income loss of \$4.5 million (Table 6.18).
- Nevada's 14 rural and frontier hospitals in Nevada collectively reported a net income of \$44.8 million. When Northeastern Nevada Regional Hospital is excluded from the analysis, the remaining 13 rural and frontier hospitals in Nevada collectively reported a net income of \$21.2 million (Table 6.19).
- Nine of the state's 14 rural and frontier hospitals report a negative income from operating activity. However, when governmental appropriations and other income are considered (e.g., mining tax revenue allocated to county governments), only four hospitals report a net income loss (Table 6.19).
- In Nevada, Medicare patients account for 34.4% of inpatient admissions, 39.3% outpatient admissions, and 16.2% of emergency department admissions in community hospitals (Tables 6.20 through 6.22).
- Medicare patients in rural and frontier hospitals in Nevada account for 61.9% of inpatient admissions, 43.8% outpatient admissions, and 28.1% of emergency department admissions in rural and frontier hospitals (Tables 6.20 through 6.22).
- In Nevada, Medicaid patients account for 26.6% of inpatient admissions, 12.0% outpatient admissions, and 37.0% of emergency department admissions in hospitals (Tables 6.20 through 6.22).

- Medicaid patients in rural and frontier hospitals in Nevada account for 11.6% of inpatient admissions, 13.7% outpatient admissions, and 27.2% of emergency department admissions in rural and frontier hospitals (Tables 6.20 through 6.22).
- The top 5 types of inpatient admissions in rural areas were COVID-19, newborn deliveries, septicemia, pneumonia, and heart failure (Table 6.23).
- The top 5 types of inpatient admissions in urban areas were septicemia, newborn deliveries, vaginal deliveries without sterilization, psychoses, and respiratory infections and inflammations (Table 6.24).

Notes: Total acute care beds include medical surgical, labor and delivery, and intensive care. A swing bed is a service that rural hospitals with a Medicare provider agreement that allows a patient to transition from acute care to skilled nursing care without leaving the hospital. Swing beds allow a patient to continue receiving skilled nursing care services (such as, physical therapy or IV medication therapy) in the same hospital facility even though acute care is no longer required.

Medicaid includes: Nevada Medicaid, Nevada Medicaid HMO, Nevada Check-up, and other Medicaid. Commercial Insurer includes: Commercial and HMO. Self-Pay includes: Self pay and uninsured. Other includes: All Workers Comp, CHAMPUS, Charity, County Indigent Referral, Negotiated Discount, NV BCBS, and Miscellaneous.

Table 6.22: Emergency Department Visits by Payor Source in Rural and Frontier Hospitals in Nevada – 2023

Hospital	Emergency Department Admissions (Percent)				
	Medicare	Medicaid	Commercial Insurer	Self-Pay	Other
Banner Churchill Community Hospital	17.2	34.6	18.8	25.9	3.4
Battle Mountain General Hospital	18.2	24.8	41.2	11.7	4.2
Boulder City Hospital	29.5	27.8	30.4	6.7	5.7
Carson Valley Health	41.7	19.5	23.2	5.4	10.1
Desert View Hospital	37.3	37.2	13.7	3.7	8.1
Grover C. Dils Medical Center	40.4	18.7	26.7	10.6	3.6
Humboldt General Hospital	20.6	36.2	34.6	0.0	8.6
Incline Village Community Hospital	29.2	9.1	47.6	11.9	2.2
Mesa View Regional Hospital	50.1	20.2	15.1	5.6	9.0
Mt. Grant General Hospital	26.0	26.8	25.4	14.2	7.6
Northeastern Nevada Regional Hospital	15.8	33.5	35.8	7.7	7.1
Pershing General Hospital	21.0	32.4	27.6	11.3	7.8
South Lyon Medical Center	26.5	30.8	26.2	9.4	7.1
William Bee Ririe Hospital	20.2	29.9	42.2	1.7	5.9
Rural and Frontier – Average	28.1	27.2	29.2	9.0	6.5
Urban – Average	16.1	37.1	31.7	8.6	6.5
Nevada – Average	16.2	37.0	31.7	8.6	6.5

Source: Intellimed International (2024).

Notes: Utilization and payor data is for the most recent fiscal year reported and accessed on December 1, 2024. Medicare includes: Traditional Fee for Service Medicare and Medicare Advantage. Medicaid includes: Nevada Medicaid, Nevada Medicaid HMO, Nevada Check-up, and other Medicaid. Commercial Insurer includes: Commercial and HMO. Self-Pay includes: Self pay and uninsured. Other includes: All Workers Comp, CHAMPUS, Charity, County Indigent Referral, Negotiated Discount, NV BCBS, and Miscellaneous.

Table 6.23: Top Twenty Types of Admissions by Diagnostic Related Group (DRG) in Community Hospitals in Rural and Frontier Nevada – 2023

MS DRG Code	Type of Admission by Diagnostically Related Group (DRG)	Utilization and Charges		
		Number of Admissions	Total Patient Days	Average Charge per Admission (Dollars)
177	Respiratory Infections and Inflammations with MCC (COVID-19)	941	5,133	45,696
795	Normal Newborn	564	819	3,371

Nevada Rural and Frontier Health Data Book

End Notes

Section One: Demographic Profile of Rural and Frontier Nevada

Tables 1.1 and 1.2: Population in Nevada by County and Population and Density in Nevada by County

Note: The figures in these tables are from the most recently released Nevada State Demographer's Office projected population numbers based on estimates of the year 2021. Distribution of population estimates occur twice a year: the certified general population estimates of the previous year are released in July and the next twenty years of population projections released in October. The Nevada State Demographer's Office is at the Nevada Department of Taxation. The Nevada State Demographer website is not updated at this time. Please go to the Taxation publications website for current information.

Table 1.3: Population in Nevada by City, County, and Region

Note: These are the certified population estimates by the Nevada State Demographer's Office, Nevada Department of Taxation annual release. There are unincorporated cities in seven of 14 rural and frontier counties in Nevada. Incorporated towns/cities may be small or large. Unincorporated populations may be large in rural and frontier counties. Carson City is a metropolitan city/county and has no rural population.

Table 1.5: Median Age of Nevadans by County

Note: American Community Survey creates estimates using five-year rolling averages released annually in December.

Table 1.6 to Table 1.11: Population by Age, Race, and Ethnicity in Nevada by County

Note: Calculations for age, race and ethnicity are from unpublished Age, Sex, Race, and Hispanic Origin population data from the Nevada State Demographer's Office based at the Nevada Department of Taxation.

Table 1.14: Population by Place of Birth in Nevada by County

Note: American Community Survey creates estimates using five-year rolling averages released annually. Current data used in this report is from American Community Survey file for all counties. Tables used in the American Community Census data.census.gov query are in the sources.

Table 1.15: Incarcerated Population in State of Nevada Correctional Facilities by County

Note: Number and percent of incarcerated population are unpublished data from the Nevada Department of Corrections. Percent of county population and rate per 1,000 population are calculated based on Nevada State Demographer's Office 2020 population estimate.

Section Two: Social and Economic Profile of Rural and Frontier Nevada

Table 2.1 through Table 2.4: Sources and Percentage of Personal Income in Nevada by County.

Note: All dollar estimates are in current dollars (not adjusted for inflation).
Table 2.3 are major categories of personal income: net earnings, etc.
Table 2.4 describes categories within transfer payments.

Table 2.5: Median Family and Household Income in Nevada by County — 2022

Note: Median family income is the sum of the incomes of all people in a household who are related by birth, marriage, or adoption. Household income includes everyone who lives in the same housing unit, regardless of relationship.

Table 2.10: Enrollment in Public and Private Schools (K-12) in Nevada by County

Note: Public Charter Schools enrollment data may be statewide or in a county, however it is combined into a statewide total.

Table 2.14: Registered Voters in Nevada by County

Note: Eligible voting population aged 18 and over does not include people living in group quarters, prisons.

Note: "Total Voter Registration" reflects all registered voters in the state that will be eligible to vote by the next federal primary or general election. This includes the following voter statuses: active, inactive, and P-17. Not all county databases may have voters in all voter status categories. "Inactive Voter" status includes any voter for whom a county has received: 1) a returned residency confirmation mailing without a forwarding address within the same county, or 2) information obtained through the United States Postal Service National Change of Address (NCOA) database indicating that a voter has moved outside the county. An inactive voter is eligible to vote so long as they have met all other legal requirements to vote (December 2022).

Section Three: Health Insurance Coverage in Rural and Frontier Nevada

Tables 3.1: Health Insurance Coverage in Nevada by County

Note: To calculate total insurance coverage in Nevada, data from American Community Survey insurance estimates and Medicare enrollee numbers were used.

Section Four: Population Health Profile of Rural and Frontier Nevada

Map 4.1: Overall County Rankings for Health Factors in Nevada

Note: County Health Rankings is based on a model with multiple population health measures. Factors for health behaviors are tobacco use, diet and exercise, alcohol and drug use, and sexual activity; clinical care is based on access to care and quality of care; social and economic factors include education, employment, income, family and social support, and community safety; physical environment factors include air and water quality, and housing and transit.

Map 4.2: Overall County Rankings for Health Outcomes in Nevada

Note: County Health Rankings is based on a model with multiple population health measures. Outcomes includes premature death and mortality; and quality of life is measured based on data from birth outcomes, physical health, mental health, and overall health.

Table 4.9 Substance Abuse and Mental Illness among Population Aged 18 and Over in Nevada by Region

Note: Northern counties are Carson City, Churchill, Douglas, Lyon, Storey. Rural/Southern Counties are Elko, Esmeralda, Eureka, Humboldt, Lander, Lincoln, Mineral, Nye, Pershing, and White Pine. * Data suppressed due to small numbers. Due to changes in survey structure due to the disruption in 2020 with Covid-19, no update has been posted.

Tables 4.11 to 4.30: Various Vital Statistics Tables by County/Region in Nevada

Note: * Data are counts that do not meet criteria, reliability, data quality or confidentiality. Counts are preliminary and are subject to change on all vital statistics tables.

Section Five: Health Care Workforce in Rural and Frontier Nevada

Tables 5.3 and 5.4: Health Sector Employment and Payroll in Nevada by County

Note: Nevada Department of Employment Training and Rehabilitation (DETR) workforce data is supplemented with hospital cost report data and United States Census Bureau County Business Patterns data. This approach is due to Bureau of Labor suppression of data for major employers in a given county.

Tables 5.5 and 5.6: Estimated and Projected Employment in the Health Care and Social Assistance Sector by Region in Nevada

Note: Rural and Frontier includes all of Nevada's 14 non-urban counties. Some data generated by the authors used DETR employment data supplemented with data from hospital cost reports and county business patterns from the United States Census Bureau.

Table 5.6: Projected Employment in the Health Care and Social Assistance Sector by Region in Nevada

Note: Rural and Frontier includes all of Nevada's 14 non-urban counties. The authors used hospital cost report employment data supplementing DETR employment growth rate for the sector.

Table 5.7 to 5.44: Licensed Healthcare Professionals by County/Region in Nevada

Note: The calculation of the number of licensed health care professionals per 100,000 population for 2020 in Tables 5.7 through 5.44 utilize county and state population estimates developed by the Nevada State Demographer's Office for 2020. Some of the population estimates presented in this data book may utilize denominators varying slightly from these numbers as the tables and per population denominators were built using the most recent numbers at the time. All health professional licensure data presented in Tables 5.7 through 5.44 refer to individuals possessing an active license with a State of Nevada licensing board. Thus, these tables exclude inactive and/or retired licensees. Specific licensure data may not be updated for year 2020 if it were not made available to the authors.

Table 5.9: Licensed Primary Care Physicians (MDs and DOs) in Nevada by County

Note: Family Medicine, General Practice, Internal Medicine, Obstetrics and Gynecology, and Pediatric physicians are considered primary care physicians.

Table 5.10: Licensed Physician Assistants (PAs) by in Nevada by County

Note: Both Allopathic and Osteopathic PAs are counted together by year.

Map 5.2: Dental Health Shortage Areas (HPSAs) in Nevada

Note: The small scattered dark green HPSAs seen across rural and frontier areas, around Pyramid Lake in Washoe County, and parts of Northern Clark County, represent shortage areas on tribal lands and reservations.

Table 5.25: Licensed Applied Behavior Analysis in Nevada by County

Note: There is no total column due to different qualifications between types of licenses.

Table 5.26 and 5.27: Licensed Social Workers in Nevada by County

Note: The education requirement for social workers ranges from an associate to a doctorate. Due to the different types of degrees a total column is not calculated.

Table 5.32 and 5.33: Licensed Emergency Medical Services (EMS) Professionals in Nevada by County

Note: There is no total column due to different qualifications between types of licenses.

Table 5.35 and Table 5.36: Licensed Medical Laboratory Professionals in Nevada

Note: The education requirement for social workers ranges from an associate to a doctorate. Due to the different types of degrees a total column is not calculated.

Table 5.45: Respiratory Therapists (RTs) in Nevada by County

Note: There is no total column due to different qualifications between types of licenses.

Section Six: Health Care Resources and Economics in Rural and Frontier Nevada

Table 6.2: Licensed Beds in Community Hospitals in Rural and Frontier Nevada

Note: The term “Critical Access Hospital” or CAH refers to a Medicare hospital facility designation from the Centers for Medicare and Medicaid Services. This designation allows small rural and frontier hospitals to receive cost-based reimbursement for inpatient and outpatient services provided to Medicare beneficiaries. As of January 2019, there are thirteen CAH hospitals. CAHs receive financial and technical assistance from the Nevada Rural Hospital Flexibility Program (Flex). The Nevada Flex Program is a federally supported program administered by the Nevada State Office of Rural Health based in the Office of Statewide Initiatives at the University of Nevada, Reno School of Medicine.

Table 6.5: Community Hospitals in Urban Nevada

Note: Employment and payroll data is for the most recent fiscal year reported and accessed October 2024. Licensed beds include acute care, psychiatric care, and skilled nursing facility beds. Northern Nevada Sierra Medical Center is a new hospital that opened in April of 2024 and has not filed a cost report to date.

Table 6.17: Net Income in Rural and Frontier Hospitals in Nevada

Note: “Other Income” includes contributions, income from investments, bequests, and miscellaneous non-patient revenue.
